involves social responsibilities to equip public debate and render government transparent Is this attitude valid given that the press is usually a private commercial actor Globally the health authority and viability of the press varies dramatically These patterns do not conform to traditional divisions between North and South East and West Instead they are much more complex How do we measure successful press regulation What concessions can the state and or society demand of the press What constitutes the irreducible core of press freedom The contributions in Volume 1 look at key jurisdictions in Europe whereas Volume 2 goes beyond Europe to analyse the situation in key jurisdictions in Asia Africa the Americas and Oceania Each volume can be used independently or as part of the complete set This work will be incredibly valuable to policy makers and academics who seek to capture the global picture for the purposes of effecting change
