**Telecommunication Economics** Antonis M. Hadjiantonis, Burkhard Stiller, 2012-04-27 This book constitutes a collaborative and selected documentation of the scientific outcome of the European COST Action IS0605 Econ Tel A Telecommunications Economics COST Network which run from October 2007 to October 2011 Involving experts from around 20 European countries the goal of Econ Tel was to develop a strategic research and training network among key people and organizations in order to enhance Europe s competence in the field of telecommunications economics Reflecting the organization of the COST Action IS0605 Econ Tel in working groups the following four major research areas are addressed evolution and regulation of communication ecosystems social and policy implications of communication technologies economics and governance of future networks future networks management architectures and mechanisms Regulation and the Performance of Communication and Information Networks Gerald R. Faulhaber, Gary Madden, Jeffrey

Petchey, 2012-01-01 Due to their economic characteristics and also to their consequences on many aspects of collective life information networks have always been at the edge of regulatory innovations and at the center of policy debates The contributors of this volume combine long term visions of the factors determining regulatory policies with up to date analyses of technicalities to be dealt with to provide the reader with an extended understanding of the issues and constraints shaping the future of digital networks Eric Brousseau Universit Paris Dauphine France and the European University Institute Italy Digital markets worldwide are in rapid flux The Internet and World Wide Web have traditionally evolved in a largely deregulated environment but recently governments have shown great interest in this rapidly developing sector and are imposing regulations for a variety of reasons that are changing the shape of these industries This book explores why the industrial organization of broadband ISPs Internet backbone providers and content application providers are in such turmoil The expert contributors straddle the turbulent past of the telecoms sector and also contribute to its exciting though unpredictable future via positive analysis of past communications policies which is then utilized to deduce lessons to guide future policy making decisions It is illustrated that broadband ISPs no longer simply provide a conduit for service delivery they are also involved in producing content and transaction services themselves in competition with content and delivery providers The blurring of the traditional lines between these three sectors as each enters into the others markets is highlighted The conclusion is that we are witnessing the emergence of powerful competing platforms linked in complex ways that challenge traditional economic analyses Exploring governance issues regulation and investment next generation service markets and wireless communication this book will prove a fascinating and illuminating read for scholars researchers post graduate students and policymakers with an interest in ICT technology and innovation economics and industrial organization

**Telecommunications Structure and Management in the Executive Branch of Government 1900-1970** Thomas E. Will,2019-07-16 In early 1970 President Richard M Nixon created a new executive office the Office of Telecommunications Policy OTP and appointed Dr Clay T Whitehead as OTP s first director Whitehead had previously been on the staff of Peter Flanigan a presidential assistant responsible for telecommunications policy at the White House What was the motivation behind this action Were political interests being served With what results Thomas Will believes that these and other questions must be raised in view of the history of the Nixon administration In an attempt to answer them he examines the development of telecommunications policy in the executive branch from 1900 to 1970 Dr Will reviews the early executive branch involvement in radio telecommunications the Radio Act of 1927 and the

Communications Act of 1934 the technological advance of radio telecommunications and its effect on the executive branch before and after World War II the appointments of telecommunications advisors to presidents from 1951 to 1967 and the creation of the President's Task Force in 1967 to deal with the problems created by an inherently limited radio spectrum He traces the steps taken to create the OTP and analyzes the extent to which the office reflected a traditional progression of executive branch telecommunications authority His study and conclusions are directly and essentially relevant to the current debate on telecommunications policy

**Telecommunications and Empire** Jill Hills, 2023-12-11 Jill Hills picks up from her pathbreaking study *The Struggle for Control of Global Communication: The Formative Century* to continue her examination of the political, technological, and economic forces at work in the global telecommunications market from World War II to the World Trade Organization agreement of 1997 In the late twentieth century focus shifted from the creation and development of global communication markets to their intense regulation The historical framework behind this control, where the market was regulated by what institution, controlled by what power, and to whose benefit, masterfully complements Hills's analysis of power relations within the global communications arena Hills documents attempts by governments to directly replace and bypass international telecommunications institutions As she shows, the results have offered indirect control over foreign domestic markets, government management of private corporations, and government protection of its own domestic communication market Hills reveals that the motivation behind these powerful regulatory efforts on person-to-person communication lies in the unmatched importance of communication in the world economy As ownership of communications infrastructure becomes more valuable, governments have scrambled to shape international guidelines Hills provides insight into struggles between U.S. policymakers and the rest of the world, illustrating the conflict between a growing telecommunications empire and sovereign states that are free to implement policy changes Freshly detailing the interplay between U.S. federal regulation and economic power, Hills fosters a deep understanding of contemporary systems of power in global communications

**Managing the Regulatory Process** J. Luis Guasch, Pablo Tomas Spiller, 1999-01-01 developing countries complementing their far-reaching privatization programs are engaged in deregulating various sectors of their economies and devising new regulatory frameworks for others, particularly the utilities sectors As economies become more open, pressures on countries to become more competitive drive the call for regulatory reform to reduce costs and foster increased productivity, competitiveness, and growth This report provides an overview of the costs and benefits of regulation throughout the world It provides case histories of regulation in different countries, developed and developing, and in various sectors such as transportation, utilities, and power It presents different strategies that were employed Furthermore, it identifies lessons learned and lays the foundations for a best practice scenario for other countries to adopt While the challenges to regulatory reform are considerable, so are the efforts that developing countries are making to face them These lessons, when properly adapted to each country's own environment, can significantly increase the likelihood of effective

regulation     Telecommunications Modeling, Policy, and Technology S. Raghavan, Bruce L. Golden, Edward A. Wasil, 2008-02-06 This book examines the newer and emerging models of telecommunications technology that play instrumental roles in providing international economic and societal interconnectivity Advancing technology in the field imposes the need to develop new models to solve complex planning and decision making problems The book explores natural output of the new technical developments and applications with selective chapter treatment on novel business models to fill technical and business needs     **Infrastructure Regulation** Darryl S. L. Jarvis, Xun Wu, 2011 Regulation of public infrastructure has been a topic of interest for more than a century Yet little is known about what works and why when it comes to infrastructure regulation This book intends to contribute to the understanding of infrastructure regulations by analyzing empirical cases in telecommunications electricity and water with examples drawn from a number of countries in Asia and beyond The book addresses the following questions Does regulation work What kind of regulation works What kinds don't work Why do some forms of regulation work and not others How do we know whether they work or not How do we isolate the effects of different political economic and legal contexts Are there systematic differences across infrastructure sectors that necessitate particular regulatory design It brings together distinguished scholars and practitioners who are experts in the area to address essential issues in regulation through conceptual and empirical studies     *New Directions in Telecommunications Policy: Information policy and economic policy* Paula R.
