Pavlik, 2013-09-13 This important volume presents the pros and cons of a national service that will meet the information needs and wants of all people In the preface Everette E Dennis Executive Director of The Freedom Forum Media Studies Center asks What will a true information highway where most citizens enjoy a wide range of information services on demand do to local communities government and business entities other units of society and democracy itself It is no longer a question of whether a vastly expanded information highway will be built in America Telephone and cable companies have already inaugurated their plans and government will most likely incorporate such plans into the economic development policy of the late 1990s The key questions remaining are Who will pay for it and Whom exactly will it serve The People s Right to Know suggests that serving the everyday citizen should be the main objective of any national initiatives in this area It counsels that evolving electronic services are new communications media that should be deployed with a main focus on the public s needs interests and desires If advances in the nation s public telephone network will make information services as easy to use as ordinary voice calls or newspapers promise vast new electronic services awaiting their readers more attention must also be devoted to the information needs and wants of everyday citizens In our increasingly multicultural and technology driven society enormous inequities exist across America s

socioeconomic classes regarding access to information critical to everyday life If an information highway is to be effective we need to ensure that all Americans have access to it its design must start with the everyday citizen This powerful new medium at our disposal must consider policy that includes attempts to close the information gap among our citizens It must ensure equal access to data regarding job education and health information services legal information on such topics as immigration and transactional services that offer assistance on such routine but time consuming tasks as renewing a driver s license or registering to vote Media and telecommunications professionals communication scholars and policymakers including two former chairmen of the Federal Communications Commission provide insights and pointed commentary on the nature and shape of an information highway designed as a new public medium aimed at serving a wide range of public needs Their work should improve our basis for deciding if there are means by which an enhanced public telecommunications network can benefit the everyday working American Handbook of Satellite Telecommunication and Broadcasting Lev I A Kovlevich Kantor,1987 The State Department, USIA, and Related Agencies Authorization Act for Fiscal Years 1994-95 United States.
