Telecommunications Reform in the Asia-Pacific Region Allan Brown, Moazzem Hossain, Duc-Tho Nguyen, 2005-02-24 This book attempts to draw lessons from the experiences of developed as well as developing countries in carrying out telecommunications reform Contributors come from academia as well as from stakeholders in telecommunications policy in a dozen countries mostly in the Asia Pacific region Globally the telecommunications industry is undergoing major changes technological advances in the form of a vast number of new digitised services ownership shifts as state owned carriers in many countries become fully or partly privatized and a general transition from monopolistic to more competitive market environments The economic and regulatory experiences derived from these changes are explored and analyzed using the USA the UK Australia and Singapore to represent developed and newly industrialized countries and China India Indonesia Malaysia the Philippines Sri Lanka Thailand and Vietnam as examples of developing countries The conclusions outlined in this timely volume hold important lessons for these as well as for other countries

The International Telecommunications Regime: Domestic Preferences and Regime Change Juan Ratto-Nielsen, 2009-12-26 This study examines the evolution of the international regime in telecommunications with the main objective of furthering our understanding of the process of regime transformation The dominant theories of international relations realism and institutional liberalism specify how states with shared interests use institutions to realize joint gains and to minimize the possibility of defection But these theories have little to say about when states will attempt to change the objectives that lead them to create the international institution in the first place The main goal of this book is to investigate and test the assumption that domestic politics by themselves can

explain the dynamics of regime creation evolution and change as it happened within the International Telecommunications Union ITU Telecommunications in Latin America Eli M. Noam,1998 Bringing together experts on Latin American

countries and providing a comprehensive view of what individual countries are doing to build a telecommunications capability Telecommunications in Latin America addresses the complicated economic and policy issues of each country s telecommunications The editor and his staff have skillfully integrated the chapters into a coherent volume keeping the information accessible to non specialists Particular attention is paid to telecommunications as a link in the chain of the regional development process and to the privatization process that has swept across the subcontinent This study will be of interest to students and professionals in the areas of communication international telecommunications companies and country governments in Latin America *Telecommunications in Africa* Eli M. Noam,1999-02-25 A modern

telecommunications network is an essential infrastructure for the world s developing nations The emergence of new technologies the entrance of supra national carriers and deregulation in the telecommunications sector have resulted in the globalization of telecommunications and the opening of markets on every continent Collecting the work of 19 expert contributors this book provides a comprehensive examination of what African countries are doing to build their telecommunications capabilities Africa has historically lagged behind other regions in developing its telecommunications infrastructure and the penetration rate for basic service is still relatively low But as some African nations undergo restructuring they have begun to open their networks to foreign investors and regional cooperative ventures to expand basic and advanced telecommunications services The contributors discuss the uneven pace of economic regulatory and social change among African nations as state telecommunications monopolies maintain their hold in some countries and give way to privatization in others Analyzing the political and economic changes of the 1990s the contributors provide clues about how Africa can shake off decades of inertia and prepare to take part in the global information economy Edited by an internationally recognized authority on telecommunications this volume is the latest in a series that surveys telecommunications in the major regions of the world Thorough and accessible it is a valuable resource for students and scholars in the areas of communications economics regulatory law telecommunications engineering and African studies as well as telecommunications professionals and policy makers Leapfrogging Development? J. P. Singh,1999-07-27

Examines how developing countries have restructured their telecommunications in order to leapfrog or accelerate development Getting a Dial Tone Lorraine Carlos Salazar,2007 Analyses the telecom reform process in Malaysia and the Philippines Looks at the institutions and actors that were the driving force behind these changes and examines state capacity market reform and rent seeking in the two countries **The Cambridge History of the Cold War: Volume 3, Endings**
