Stamping Through Astronomy Renato Dicati, 2013-06-18 Stamps and other postal documents are an attractive vehicle for presenting astronomy and its development Written with expertise and great enthusiasm this unique book offers a historical and philatelic survey of astronomy and some related topics on space exploration It contains more than 1300 color reproductions of stamps relating to the history of astronomy ranging from the earliest observations of the sky to modern research conducted with satellites and space probes Featured are the astronomers and astrophysicists who contributed to this marvelous story not only Ptolemy Copernicus Kepler Newton Herschel and Einstein but also hundreds of other minor protagonists who played an important role in the development of this the most ancient yet the most modern of all the sciences The book also examines in depth the diverse areas which have contributed to the history of astronomy including the instrumentation the theories and the observations Many stamps illustrate the beauty and the mystery of celestial objects galaxies nebulae stars planets satellites comets and minor celestial bodies *Astronomy* Agnes Mary Clerke, Alfred Fowler, John Ellard Gore, 1898 Frontiers Of Space And Ground-Based Astronomy Willem Wamsteker, Malcolm S. Longair, Y. Kondo, 2012-12-06 ROSAT Observations G HASINGER Max Planck Institut für extraterrestrische Physik D 85740 Garching Germany Abstract This review describes the most recent advances in the study of the extragalactic soft X ray background and what we can learn about its constituents The deepest pointed observations with the ROSAT PSPC are discussed The logN logS relation is presented which reaches to the faintest X ray fluxes and to the highest AGN surface

densities ever achieved The N S relation shows a 2 density in excess of 400 deg at the faintest fluxes and a flattening below the Einstein Deep Survey limit About 60% of the extragalactic background has been resolved in the deepest field Detailed source spectra and first optical and radio identifications will be discussed The results are put into perspective of the higher energy X ray background Key words X rays background radiations active galactic nuclei 1 Introduction The extragalactic X ray background XRB discovered about 30 years ago has been studied extensively with many X ray experiments in particular with the satel lites HEAO I and II see ego Boldt 1987 and with ROSAT e g Hasinger et al 1993 Figure 1 shows a compilation of some of the most recent spectral measure ments for the X ray background Over the energy range from 3 to about 100 keY its spectrum can be well approximated by an optically thin thermal bremsstrahlung model with kT 40 keY while at lower X ray energies a steepening into a new component has been observed observed e g

The Future of Small Telescopes in the New Millennium Terry D. Oswalt, 2012-12-06 The motivation for these volumes is to provide a vision for the future of small telescopes While this is an admirable task ultimately I believe that as happens all the time in science the prognostications will be overtaken by a rapidly changing scientific reality As Virginia Trimble points out in chapter 1 the kinds of big questions that face us as astronomers today are rather different than the ones that drove the construction of astronomical facilities through much of the twentieth century Right now it appears that small telescopes will not have a lot of influence in answering those questions though they will of course contribute enormously to the many issues discussed throughout the three volumes We are on the verge of opening a whole new parameter space that may revolutionize the way we think of small telescopes and their role in astronomy the domain of the rapidly variable sky While the LSST is the most prominent example it is a long way in the future Nemiroff Rafert chapter 2 consider the value of monitoring large parts of the sky on a continuous basis using technology similar to a webcam They have installed their CONCAM2 at four locations including Kitt Peak A related project built and operated by the Harvard graduate student Gaspar Bakos HAT-1 Hungarian Automated Telescope also is in operation at Kitt Peak
