Dintrone, 1996 Television history has become one of the hottest areas of research in popular culture Because the field is relatively new and so wide ranging no matter what one is researching much of the relevant material will be found scattered through numerous other works frustrating scholarly progress This work makes the television researcher s job easier by providing a single index to 341 books that include information on 1 002 shows Most of the books deal exclusively with television though some autobiographies biographies Congressional hearings and works on communication and the media are also indexed For a show to be included it must have been carried on NBC CBS ABC or Fox and must have been a series Shows on PBS are generally not included though exceptions have been made for Sesame Street and Mister Rogers Neighborhood      *Screen Stories and Moral Understanding* Carl Plantinga, 2023 The stories we tell and show in whatever medium play varied roles in human cultures One such role is to contribute to moral understanding Moral understanding goes beyond moral knowledge it

is a complex cognitive achievement that may consist of one or more of the following the ability to understand why to ask the right questions categorization the application of models to specific incidents or the capacity to make connections between morally charged situations that have a common underlying meaning While the disciplines of communication psychology philosophy and film and media studies have all made significant scholarly progress on this issue they make different grounding assumptions and use different terminologies Screen Stories and Moral Understanding approaches the topic from an interdisciplinary perspective and explores the conditions under which stories we view on screens movies streamed series and television can lead to moral understanding in viewers In five sections this book explores the nature of moral understanding in relation to screen stories the means by which moving image fictions can transfer knowledge to and cultivate perspectives in viewers the role of affect in generating moral understanding the viewer's engagement with characters and what we do with screen stories after viewing them *The Psychology of War and Peace* Fred van Houten, 2013-06-29 Can a Baby Be an Enemy Our world is in a deep prolonged crisis The threat of global nuclear war the chronic condition of local wars the imperilled environment and mass starvation are among the major forms this crisis takes The dangers of massive overkill overexploitation of the environment and overpopulation are well known but surprisingly little has been said about their potential interactions their bearing upon each other If there were to be a nuclear confrontation between today's superpowers it might not take place in today's world but in a far less friendly habitat such as the world may be some decades hence And it need hardly be added that the era of this particular super power configuration may be waning rapidly its place to be taken by other international arrangements not necessarily less threatening To understand and cope with our situation we need correspondingly serious reflection This volume forms a welcome part of that process Unavoidably a large part of our thinking about the issues of human survival must be oriented to physical and biological aspects of the total danger But it has not escaped the authors of this book that coupled with these aspects there are profound psychological dangers such as loss of the sense of futuristic moral deterioration and a fatalistic decline in the will to struggle to protect our home the Earth Mass Media and Drug Prevention William D. Crano, Michael Burgoon, Stuart Oskamp, 2001-11-01 This book tells the story of the mass media's potential in the war against drug abuse It is based on scientific evidence on the use of media in health promotion and disease prevention Past approaches successes and failures alike are included to help enlighten future programs of research and practice Advice about the logical steps that must be taken to help alleviate the crisis of drug abuse is featured throughout The book will appeal to social scientists interested in persuasion and the media Each chapter offers information to help the conscientious practitioner maximize persuasive effects of a mass mediated presentation *The Oxford Handbook of Political Communication* Kate Kenski, Kathleen Hall Jamieson, 2017 The Oxford Handbook of Political Communication provides contexts for viewing the field examines political discourse media and interpersonal and small group political communication and considers political communication's evolution inside the altered

political communication landscape Agendas for future research and innovation are presented

*Homicide* Leonard Beeghley, 2004-09-08 The American homicide rate remains dramatically higher than that in other Western nations News of a murder has become a routine event How do we explain such high levels of lethal violence in the world's leading democracy Echoing Durkheim's *Suicide* this book focuses on one important phenomenon to explain larger currents in American society Leonard Beeghley examines the historical and cross national dimensions of homicides and evaluates previous attempts to explain it He finds the sources of America's murder rate in the greater availability of guns the expansion of illegal drug markets greater racial discrimination more exposure to violence and sharper economic inequalities He deftly blends the evidence related to each of these factors into a well reasoned sociological analysis of the nature of American society Features Highlights how sociology can be used to explain problems and seek solutions Distinguishes between structural and social psychological levels of analysis Provides a contrasting perspective to Messner Rosenfeld's widely assigned *Crime and the American Dream* Uses metaphors and analogies in order to make sociological ideas meaningful to students Employs an engaging writing style to place the analysis in the scholarly literature Offers clear explanations of Durkheim Weber Merton and others that show their usefulness for understanding modern life
