Sipri Yearbook 1979 World Armaments And Disarmament:

The Evolution of Biological Disarmament Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective **SIPRI yearbook 1979**, 1979 **The Structure of the Defense Industry** Nicole Ball, Milton Leitenberg, 2021-05-30 Proponents of arms control and disarmament are often confronted with the argument that reductions in defense expenditure lead to cutbacks in military industries and thus to economic hardship While a reduction in defense production would cause some economic dislocation this would be mitigated by the ability of the economy to adapt to changing patterns of production This book first published in 1983 assesses the likely effects of reductions in defense industries by an examination of the roles these industries play in national economies Each chapter discusses industry employment output research and development capital value profitability concentration and competition internal organization and regional employment concentration Other questions considered include the economic importance of weapons exports the defense industry as a leading edge in maintaining national technological capabilities and the reliance of individual firms on defense contracting World Armaments and Disarmament, 1979 The Year Book Of World Affairs, 1981 George W. Keeton, Georg Schwarzenberger, 2019-08-22 First published in 1981 The Council of the London Institute of World Affairs has carefully reconsidered the lessons to be drawn from the Institute's record in its first half century and reshaped its plans of activities for the 1980s As in an earlier cold peace era the Council is united in its resolve not to be taken by surprise by any of the contingencies that on a darkening world scene must be anticipated in medium range planning **The Economics of Military Expenditures** Christian Schmidt, 1987-07-07 **SIPRI World Armaments and Disarmaments** Stockholm International Peace Research Institute, 1979 **The Naval Arms Trade** Ian Anthony, 1990 This book offers a sober appraisal of the world trade in naval weapon systems at a time when recent attacks on merchant shipping in the Persian Gulf have kept maritime security at the centre of global attention At the same time India outside the international non proliferation regime has become the first ever customer for a nuclear attack submarine In 1987 88 the most expensive and controversial arms sales were related to naval systems and yet while regional navies are busy

increasing their firepower the traditional naval powers remain dependent on their sea borne trade In particular the book highlights critical areas in which trade in naval systems differs from the sale of land or air systems and it discusses the implications of these differences *Seapower in the Nuclear Age* Joel J. Sokolsky,2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US s Cold War maritime strategy showing how NATO s maritime forces were organised in the period It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance s nuclear and conventional deterrent forces It looks at the structure of the main naval commands the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO s naval posture in the 1970s Drawing upon many declassified documents this account fills an important gap in postwar literature on American seapower and its relation to European security It also addresses important aspects of NATO strategy and organisation

New Directions in Strategic Thinking Robert O'Neill,D.M. Horner,2021-01-26 This book first published in 1981 examines the broader aspects of international strategic relations and analyses Cold War developments within particular nations fields of warfare and areas of political military interaction The role of force in international society changed as the nuclear deadlock between the superpowers continued with military forces being deployed for political purposes in situations only just short of war The balance between NATO and Warsaw Pact forces also changed as American technology increased and short range nuclear missiles were deployed in Europe This book also examines the development of strategic thinking in China Japan and India as well as insurgency in the Third World so often the site for proxy superpower conflict
