Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for

the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field The Lure of Literacy Michael Harker, 2014-12-03 readers of LiCS will find a strong argument for how understandings of literacy are fundamental to the work that compositionists do making this book useful not only to those doing similar work but also to be shared with colleagues who have less familiarity with literacy studies The Lure of Literacy presents a model of how theories of literacy can be applied to the debates that beset compositionists again and again offering a way out of their unproductive cycles Literacy in Composition The Lure of Literacy promises to transcend the stale and unproductive debate on freshman composition that has gripped English studies for more than a century It is the first book to chart the origin of the discussion from the early twentieth century to the advent of the New Literacy Studies Michael Harker recontextualizes proposals to abolish compulsory composition and reimagines pedagogical conditions in English studies in order to present a different model for first year writing This new model for compulsory composition programs focuses on students attitudes about composition and interrogates the very idea of literacy itself
