critical accounts of particular theorists and research themes which have straddled this divide This volume aims to strengthen ties between organization studies and contemporary sociological work at a time when there are increasing institutional barriers to such cooperation potentially generating a myopia that constricts new developments Used in conjunction with its companion volume *The Oxford Handbook of Sociology and Organization Studies: Classical Foundations* the reader is provided with a comprehensive account of the productive and critical interaction between sociology and organization studies over many decades Highly international in scope theorists and themes are drawn from both the USA and Europe in equal measure Similarly the authors of the chapters are drawn from both sides of the Atlantic The result is a series of chapters on individuals and key research themes and debates which will provide faculty and post graduate researchers with appreciative authoritative and critical accounts that can be drawn on to design courses or provided guided reading to the field

Crime, Drugs and Social Theory Chris Allen, 2017-03-02 Do criminal cultures generate drug use *Crime, Drugs and Social Theory* critiques conventional academic and policy thinking concerning the relationship between urban deprivation crime and drug use Chris Allen outlines an innovative constructionist phenomenological perspective to explore these relationships in a new light He discusses how people living in deprived urban areas develop natural attitudes towards activities such as crime and drug use that are prevalent in the social worlds they inhabit and shows that this produces forms of articulation such as 'I don't know why I take drugs I just take them and drugs come naturally to me' He then draws on his constructionist phenomenology to help understand the natural attitude towards crime and drugs that emerge from conditions of urban deprivation as well as the non reasoned forms of articulation that emerge from this attitude The book argues that understanding the conditions in which drug users deviate from their natural attitude can help effective intervention in the lives of drug users
