rights and responsibilities Women contributed through their labor to the welfare of the community Women played an important part in public affairs They practiced birth control through abortion and infanticide Women committed crimes and were indicted They owned property and administered estates The drive toward economic growth and expansion abroad rested on the capacity of women to staff and manage economic endeavors at home In the later Middle Ages the social position of women altered significantly and the reasons why the role of women in society tended to become more restrictive are examined in these essays

Women in Medieval Europe Jennifer Ward, 2014-06-11 Women in Medieval Europe were expected to be submissive but such a broad picture ignores great areas of female experience Between the thirteenth and fifteenth centuries women are found in the workplace as well as the home and some women were numbered among the key rulers saints and mystics of the medieval world Opportunities and activities changed over time and by 1500 the world of work was becoming increasingly restricted for women Women of all social groups were primarily engaged with their families looking after husband and children and running the household Patterns of work varied geographically In the northern towns women engaged in a wide range of crafts with a small number becoming entrepreneurs Many of the poor made a living as servants and labourers Prostitution flourished in many medieval towns Some women turned to the religious life and here opportunities burgeoned in the thirteenth century The Middle Ages are not remote from the twenty first century the lives of medieval women evoke a response today The medieval mother faced similar problems to her modern counterpart The sheer variety of women's experience in the later Middle Ages is fully brought out in this book
