Skyscrapers The Worlds Tallest Buildings And How They Work:

Skyscrapers David Bennett, James R. Steinkamp, 1995 Trace the history of the skyscraper from its beginnings in Chicago through the splendour of the Art Deco age all the way to the 21st century *Supertall: How the World's Tallest Buildings Are Reshaping Our Cities and Our Lives* Stefan Al, 2022-04-12 A thoughtful inquiry into the new generations of skyscrapers There is a lot of rich history here well and concisely told Paul Goldberger New York Times Book Review The global boom in skyscrapers why it s happening now how they re made and what they do to cities and people We are living in a new urban age and its most tangible expression is the supertall megastructures that are dramatically bigger higher and more ambitious than any in history Cities around the world are racing to build the first mile high building stretching the limits of engineering and design as never before In this fascinating work of urban history and design TED resident Stefan Al himself an experienced architect explores the factors that have led to this worldwide boom He reveals the marvelous and underappreciated feats of engineering that make today s supertalls a reality from double decker elevators that silently move up to 50 miles per hour to the sophisticated blend of polymers and steel fibers that enables concrete to withstand 8 000 tons of pressure per square meter Taking readers behind the scenes of the building and design of remarkable megastructures both from the past the Empire State Building St Paul s Cathedral the Eiffel Tower and the present Dubai s Burj Khalifa London s Shard Shanghai Tower Al demonstrates the impact of these innovations Yet while the supertall is undoubtedly a testament to great technological victories it can come at an environmental and social cost Focusing on four global cities London New York Hong Kong and Singapore Al examines the risks of wealth inequality carbon emissions and contagion that stem from supertalls And he uncovers the latest innovations in sustainable building from skyscrapers made of wood to tree covered buildings that promise to yield a better urban future Featuring more than thirty architectural drawings *Supertall* is both a fascinating exploration of our greatest accomplishments and a powerful argument for a more equitable way forward

The Skyscraper and the City Don LePan, 2025-09-18 *The Skyscraper and the City* brings together thirty years of the artist s watercolor images of cities LePan s work goes against the tradition of presenting skyscrapers with a hard and precise verticality the lines of these towers blur and bleed into each other into the sky and the natural world and often into the human life of the city In their sense of movement these watercolor images of bridges and baseball stadiums as well as of skyscrapers at times recall the work of John Marin while in their viewpoint they may bring to mind the bird s eye view city paintings of Oskar Kokoschka or John Hartman LePan s paintings have been exhibited only once in a solo show in Brooklyn in 2008 Commenting on that exhibition Hartman whose sweeping canvasses have been acclaimed world wide described these watercolor works as very good and together they form a coherent and focused body of work *The Skyscraper and the City* includes images from as far afield as Cape Town London and Sydney but the primary focus is on the North American city Calgary Chicago Los Angeles New Orleans New York and Vancouver are each the subject of numerous paintings in all over

fifty cities are represented Substantial captions accompanying many of the images discuss the circumstances in which the work was painted various aesthetic issues and the architectural history of the buildings depicted An appendix includes examples of the artist s preliminary sketches and photographs In a brief introduction LePan discusses the history of skyscraper art the nature of watercolor as a medium and his own background as a watercolor painter **The Handy**

Skyscrapers of the Future Carlo Aiello,2011-01-01 No other architectural genre captures our imagination and reflects our cultural and technological achievements like these towers that pierce the sky We start off with the history and evolution of building high from the Egyptian pyramids Gothic cathedrals and first American skyscrapers to the contemporary reality in Asia and the Middle East We present two fascinating interviews the first one with Carol Willis the founder and director of the Skyscraper Museum in New York City who explains the true genetics and economics behind the birth and future of the skyscraper The second one with Italian artist Giacomo Costa who shares his vision about the relationship between the natural environment human activity and supernatural reality with provocative images of an apocalyptic urban future Javier Quintana exposes the time gap between new architectural concepts and their built reality like Arne Hisek s City of the Future designed in 1928 and materialized in 1998 by Cesar Pelli as the Petronas Towers in Kuala Lumpur or Sergei Lopatin s 1925 idea for the Veshenka Tower in Moscow later observed as the Willis Tower former Sears Tower in Chicago in 1974

Another group of essays explore the global influence of Manhattan as a contemporary Babylon to be replicated across the world or the role of the Italian Futurists Japanese Metabolists and Archigram who influenced generations of architects and designers to push forward the concept of vertical living In the Opinion section you will find critiques on some of the latest ideas for skyscraper design by some of the most forward looking architects like the concept of pixilated tectonics in Le Project Triangle in Paris by Herzog while Morphosis Architects explores new programs for vertical density with The Phare Tower Lastly Studio SHIFT masterfully integrates their Miyi Tower in Sichuan China with the existing landscape Central to this book are thirty projects from eVolo s 2009 Skyscraper Competition which look into the future of the skyscraper with the use of new technologies programs and aesthetic expression Sustainability globalization flexibility and adaptability are just some of the multi layered elements explored by some the entries You will find examples of cities in the sky horizontal skyscrapers that link various cities or emergency architecture for disaster zones
