**Food for the Brain** Joseph Veebe, Do you worry about cognitive and mental decline as you get older Do you worry about dementia A healthy brain is a key to a high quality life especially when you get older How can we nourish our brain the same way we nourish our bodies Nature provides for foods that nourish both the body and brain Most often the focus of the diet is physical nourishment muscle building weight loss energy athletic performance and many others Similar to foods that help the body there are many foods that help the brain improve memory and help slow down the aging process While it is normal to have your physical and mental abilities somewhat slow down with age diseases such as Alzheimer s and Parkinson s accelerate these declines even more As we age brain function decline accelerates and more and more brain cells eventually die over time In a normal brain one not impacted by Alzheimer s or dementia your brain may compensate for the loss of nerve cells in many ways As the brain loses some of its nerve cells it attempts to make connections between remaining nerve cells The brain may form totally new nerve cells especially in cases where one is learning a new language a new musical instrument or something that has not been done before Learning something new most often results in new brain connections and new nerve cells In addition some of brain s unused or redundant cells come into play as they are now activated Besides losing cells and brain attempting to compensate them there may be other impacts to the brain due to age such as Blood flow to the brain decreases Nerve cells may lose some of the signal receptors for messages coming out of senses such as eyes ear skin etc Nerves conduct transmit signals more slowly This can cause a slower response or increased reaction time or slow reflexes Short term memory vocabulary ability to learn new things are impacted With regular exercises strength training practicing martial arts and other physical activities can arrest the physical decline This book s primary focus is on managing the decline in mental and brain function through diet
