Descartes: An Intellectual Biography Stephen Gaukroger,1995-03-30 Ren Descartes 1596 1650 is the father of modern philosophy and one of the greatest of all thinkers This is the first intellectual biography of Descartes in English it offers a fundamental reassessment of all aspects of his life and work Stephen Gaukroger a leading authority on Descartes traces his intellectual development from childhood showing the connections between his intellectual and personal life and placing these in the cultural context of seventeenth century Europe Descartes early work in mathematics and science produced ground breaking theories methods and tools still in use today This book gives the first full account of how this work informed and influenced the later philosophical studies for which above all Descartes is renowned Not only were philosophy and science intertwined in Descartes life so were philosophy and religion The Church of Rome found Galileo guilty of heresy in 1633 two decades earlier Copernicus theories about the universe had been denounced as blasphemous To avoid such

accusations Descartes clothed his views about the relation between God and humanity and about the nature of the universe in a philosophical garb acceptable to the Church His most famous project was the exploration of the foundations of human knowledge starting from the proof of one's own existence offered in the formula *Cogito ergo sum* I am thinking therefore I exist Stephen Gaukroger argues that this was not intended as an exercise in philosophical scepticism but rather to provide Descartes scientific theories influenced as they were by Copernicus and Galileo with metaphysical legitimation This book offers for the first time a full understanding of how Descartes developed his revolutionary ideas It will be welcomed by all readers interested in the origins of modern thought
