Cultural Perspectives on Food and Nutrition Marcy Schveibinz, 1994 *Sociologies of Food and Nutrition* Wm. Alex McIntosh, 2013-11-21 Here Wm Alex McIntosh analyzes the relationship between food and nutrition and social factors using a wide array of sociological theories The author applies theories of social organization culture social stratification social change rural sociology the sociology of the body and social problems to empirical problems in food and nutrition By doing so he sheds light on issues such as the rise of the state population growth famine obesity eating disorders the maldistribution of food across class gender and ethnic boundaries and the changing nature of the food industry **Food and Nutrition** Paul Fieldhouse, 2013-12-14 As someone who was trained in the clinical scientific tradition it took me several years to start to appreciate that food was more than a collection of nutrients and that most people did not make their choices of what to eat on the biologically rational basis of nutritional composition This realization helped to bring me to an understanding of why people didn't always eat what I believed was good for them and why the patients I had seen in hospital as often as not had failed to follow the dietary advice I had so confidently given When I entered the field of health education I quickly discovered the famous World Health Organization definition of health as being a state of complete physical mental and social well being and not merely the absence of disease Health was a triangle and I had been guilty of virtually ignoring two sides of that triangle As I became involved in practical nutrition education initiatives the deficiencies of an approach based on giving information about nutrition and physical health became more and more apparent The children whom I saw in schools knew exactly what to say when asked to describe a nutritious diet they could recite the food guide and list rich sources of vitamins and minerals but none of this intellectual knowledge was reflected in their own actual eating habits **Nutrition Education: Linking Research, Theory, and Practice** Isobel R.
