Abstract

Social cohesion and a sustainable labour market remain the aims of sustainable development policy. However, income inequalities and labour market policies are more often separately analysed. To fill the identified research gap, our article presents the results of an analysis of interactions between active and passive labour market policies and income inequalities in the European Union. The 27 countries were divided into two clusters based on their active and passive labour market policy (LMP) expenditures in 2019. These clusters sustain the basis for analysing the interactions between LMP and income inequalities in its different measures. The results reveal that labour market interventions interact with income inequalities, decreasing disposable income inequalities (equalising the disposable income after transfers and taxes) and therefore contributing to social cohesion. This paper concerns social cohesion as the manifestation of intragenerational justice.

Economy of Hungary Adam Fabry, 2019-04-03 This book explores the political economy of Hungary from the mid 1970s to the present. Widely considered a poster boy of neoliberal transformation in post communist Eastern Europe until the mid 2000s, Hungary has in recent years developed into a model illiberal regime. Constitutional checks and balances are non functioning, the independent media, trade unions and civil society groups are constantly attacked by the authorities, there is widespread intolerance against minorities and refugees and the governing FIDESZ party led by Prime Minister Viktor Orbán controls all public institutions and increasingly large parts of the country's economy. To make sense of the politico economic roller coaster that Hungary has experienced in the last four decades, Fabry employs a Marxian political economy approach emphasising competitive accumulation, class struggle both between capital and labour as well as different fractions of capital and uneven and combined development. The author analyses the neoliberal transformation of the Hungarian political economy and argues that the drift to authoritarianism under the Orbán regime cannot be explained as a case of Hungarian exceptionalism but rather represents an outcome of the inherent contradictions of the variety of neoliberalism that emerged in Hungary after 1989.
