Social Construction Of The Ocean:

The Social Construction of the Ocean Philip E. Steinberg, 2001-10-25 This 2001 book presents a history of the uses regulations and representation of the world ocean from approximately 1450 through the present This history is told through a territorial political economy lens borrowing from world systems theory economic geographic studies of the spatiality of capitalism political geographic work on the history of territoriality and post structural work on social conflict in the production of space Just as the modern era has been characterized by a conflicting set of dynamic and contested spatiality on land so has it been characterized by a conflicting set of spatial functions at sea Evidence is marshaled from legal texts literary and artistic creations cartographic representations advertisements commercial and military history and policy debates The book concludes by considering how lessons learned from the history of the ocean may be applied to emerging spaces such as cyberspace where there is a similarly problematic fit between social processes and the institutions of state governance

The Social Construction of the Ocean and Modern Taiwan Kuang-hao Hou, 2022-07-22 This book interprets the meanings of the uses regulations and representations of the ocean undertaken by the state and other societal power sources in modern Taiwan between 1949 and 2016 Following Michael Mann s historical sociology and Philip Steinberg s political geography the book analyses the construction of the ocean by the society of Taiwan in terms of ideological political military and economic sources of power It also provides a structural foundation for creating a framework of the politics in maritime and ocean affairs through the lens of an interpretive analysis of the modern Taiwanese construction of the ocean Moreover it explores the social constructions of the ocean through the written works of intellectuals in natural sciences social studies and humanities in Taiwan after the 1980s Succinctly revealing how Taiwanese society has influenced the social construction of the ocean this book will appeal to scholars and students interested in Taiwanese politics and history political geography and Asian politics

Indian Ocean Imaginings Joshua Esler, Mark Fielding, 2022-11-28 This book is a multidisciplinary study of the Indian Ocean region bringing together perspectives from the disciplines of history defense and strategic studies cultural and religious studies and environmental studies From the earliest exchanges through Sumerian and Harappan trade to emerging geopolitical alliances in the twenty first century this volume demonstrates both the continuity and change of the region as well as its unity and diversity The expanse of this ocean and its littoral rim is connected through the social imaginary which enables these processes It is with the stories of the peoples inhabiting this rim that this book is concerned told both through micro studies of the everyday lives of the region s people and through macro studies centered around civilizations empires nation states and climate change

Aquaman and the War Against Oceans Ryan Poll, 2022-11 The reimagining of Aquaman in *The New 52* transformed the character from a joke to an important figure of ecological justice In *Aquaman and the War against Oceans* Ryan Poll argues that in this twenty first century iteration Aquaman becomes an accessible figure for charting environmental violences endemic to global capitalism and for developing

a progressive and popular ecological imagination Poll contends that The New 52 Aquaman should be read as an allegory that responds to the crises of the Anthropocene in which the oceans have become sites of warfare and mass death The Aquaman series which works to bridge the terrestrial and watery worlds can be understood as a form of comics activism by its visualizing and verbalizing how the oceans are beyond the projects of the human and humanism and simultaneously are all too human geographies that are inextricable from the violent structures of capitalism white supremacy and patriarchy The New 52 Aquaman Poll demonstrates proves an important form of ocean literacy in particular and ecological literacy more generally

"Framing the Ocean, 1700 to the Present " Tricia Cusack,2017-07-05 Before the eighteenth century the ocean was regarded as a repulsive and chaotic deep Despite reinvention as a zone of wonder and pleasure it continued to be viewed in the West and elsewhere as uninhabited empty space This collection spanning the eighteenth century to the present recasts the ocean as social space with particular reference to visual representations Part I focuses on mappings and crossings showing how the ocean may function as a liminal space between places and cultures but also connects and imbricates them Part II considers ships as microcosmic societies shaped for example by the purpose of the voyage the mores of shipboard life and cross cultural encounters Part III analyses narratives accreted to wrecks and rafts what has sunk or floats perilously and discusses attempts to recuperate plastic flotsam Part IV plumbs ocean depths to consider how underwater creatures have been depicted in relation to emergent disciplines of natural history and museology how mermaids have been reimagined as a metaphor of feminist transformation and how the symbolism of coral is deployed by contemporary artists This engaging and erudite volume will interest a range of scholars in humanities and social sciences including art and cultural historians cultural geographers and historians of empire travel and tourism

The Geopolitics of Deep Oceans John Hannigan,2016-01-11 Long regarded as an empty and inhospitable environment the deep ocean is rapidly emerging as an ecological hot spot with a remarkable diversity of biological life Yet the worlds oceans are currently on a dangerous trajectory of decline threatened by acidification oil and gas drilling overfishing and in the long term deep sea mining bioprospecting and geo engineering In The Geopolitics of Deep Oceans noted environmental sociologist John Hannigan examines the past present and future of our planets final frontier The author argues that our understanding of the deep its definition boundaries value ownership health and future state depends on whether we see it first and foremost as a resource cornucopia a political chessboard a shared commons or a unique and threatened ecology He concludes by locating a new storyline that imagines the oceans as a canary in the mineshaft for gauging the impact of global climate change The Geopolitics of Deep Oceans is a unique introduction to the geography law politics and sociology of the sub surface ocean It will appeal to anyone seriously concerned about the present state and future fate of the largest single habitat for life on our planet

Perspectives on Waste from the Social Sciences and Humanities Richard Ek,2020-03-26 Waste is something we encounter on an everyday basis Today the waste mountain is increasing despite ambitious measures being taken to

decrease it Consequently increased scholarly interest is being devoted to waste but primarily from a technocratic and scientific point of view This compilation offers different perspectives on waste its characteristics and its presence in the world from social scientist and humanist standpoints Waste is the constant companion to the human and is thus inherent in modern society Therefore waste needs to be further approached and understood from a plethora of scholarly perspectives and disciplines and further investigated through a multitude of methodologies and data collection techniques The imagination of a future where waste preventive actions and circular economies permeate society can only be a reality if technocratic and scientific accounts of what is to be done when and how are complemented by social scientific and humanist concepts of the nature and constitution of waste Such a perspective offers the possibility to understand how waste is constituted through relationships language materials politics practices and structures This book shows that philosophers historians cultural theorists and economists have much to offer on the topic of waste as a part of everyday modern life

Shakespeare's Ocean Daniel Brayton, 2012 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare's Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from *The Comedy of Errors* to the valedictory *The Tempest* Brayton demonstrates Shakespeare's remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work *The Godman and the Sea* Michael J. Thate, 2019-10-04 If scholars no longer necessarily find the essence and origins of what came to be known as Christianity in the personality of a historical figure known as Jesus of Nazareth it nevertheless remains the case that the study of early Christianity is dominated by an assumption of the force of Jesus's personality on divergent communities In *The Godman and the Sea* Michael J Thate shifts the terms of this study by focusing on the Gospel of Mark which ends when Mary Magdalene Mary the mother of James and Salome discover a few days after the crucifixion that Jesus's tomb has been opened but the corpse is not there Unlike the other gospels Mark does not include the resurrection portraying instead loss puzzlement and despair in the face of the empty tomb Reading Mark's Gospel as an exemplary text Thate examines what he considers to be retellings of other traumatic experiences the stories of Jesus's exorcising demons out of a man and into a herd of swine his stilling of the storm and his walking on the water Drawing widely on a diverse set of resources that include the canon of western fiction classical literature the psychological study of trauma phenomenological philosophy the new materialism psychoanalytic theory poststructural philosophy and Hebrew Bible scholarship as well as the expected catalog of New Testament tools of biblical criticism in general and Markan scholarship in particular *The Godman and the Sea* is an experimental reading of the Gospel of Mark and the social force of the sea within its traumatized world

More fundamentally however it attempts to position this reading as a story of trauma ecstasy and what has become through the ruins of past pain

The Routledge Handbook of Ocean Space Kimberley Peters, Jon Anderson, Andrew Davies, Philip Steinberg, 2022-07-29 Invisible as the seas and oceans may be for so many of us life as we know it is almost always connected to and constituted by activities and occurrences that take place in on and under our oceans The Routledge Handbook of Ocean Space provides a first port of call for scholars engaging in the oceanic turn in the social sciences offering a comprehensive summary of existing trends in making sense of our water worlds alongside new agenda setting insights into the relationships between society and the seas around us Accordingly this ambitious text not only attends to a growing interest in our oceans past and present it is also situated in a broader spatial turn across the social sciences that seeks to account for how space and place are imbricated in socio cultural and political life Through six clearly structured and wide ranging sections The Routledge Handbook of Ocean Space examines and interrogates how the oceans are environmental historical social cultural political legal and economic spaces and also zones where national and international security comes into question With a foreword and introduction authored by some of the leading scholars researching and writing about ocean spaces alongside 31 further carefully crafted chapters from established as well as early career academics this book provides both an accessible guide to the subject and a cutting edge collection of critical ideas and questions shaping the social sciences today This handbook brings together the key debates defining the field in one volume appealing to a wide cross disciplinary social science and humanities audience Moreover drawing on a range of international examples from a global collective of authors this book promises to be the benchmark publication for those interested in ocean spaces past and present Indeed as the seas and oceans continue to capture world wide attention and the social sciences continue their seaward turn The Routledge Handbook of Ocean Space will provide an invaluable resource that reveals how our world is a water world

Disputing New France Helen Dewar, 2022-01-15 From the early sixteenth century thousands of fishermen traders from Basque Breton and Norman ports crossed the Atlantic each year to engage in fishing whaling and fur trading which they regarded as their customary right In the seventeenth century these rights were challenged as France sought to establish an imperial presence in North America granting trading privileges to certain individuals and companies to enforce its territorial and maritime claims Bitter conflicts ensued precipitating more than two dozen lawsuits in French courts over powers and privileges in New France In *Disputing New France* Helen Dewar demonstrates that empire formation in New France and state formation in France were mutually constitutive Through its exploration of legal suits among privileged trading companies independent traders viceroys and missionaries this book foregrounds the integral role of French courts in the historical construction of authority in New France and the fluid nature of legal political and commercial authority in France itself State and empire formation converged in the struggle over sea power control over New France was a means to consolidate maritime authority at home and supervise major Atlantic trade routes The colony also became part of

international experimentations with the chartered company an innovative Dutch and English instrument adapted by the French to realize particular strategic political and maritime objectives Tracing the developing tools of governance privilege granting and capital formation in New France Disputing New France offers a novel conception of empire one that is messy and contingent responding to pressures from within and without and deeply rooted in metropolitan affairs **Fathoming the Ocean** Helen M Rozwadowski,2009-06-30 An amiable in depth examination of the most critical era for the development of modern oceanography Publishers Weekly In a history at once scientific and cultural Helen Rozwadowski shows us how the Western imagination awoke to the ocean s possibilities in maritime novels in the popular hobby of marine biology in the youthful sport of yachting and in the laying of a trans Atlantic telegraph cable The ocean emerged as important new territory and scientific interests intersected with those of merchant industrialists and politicians Rozwadowski documents the popular crazes that coincided with these interests from children s sailor suits to the home aquarium and the surge in ocean travel She describes how beginning in the 1860s oceanography moved from yachts onto the decks of oceangoing vessels and landlubber naturalists found themselves navigating the routines of a working ship s physical and social structures Fathoming the Ocean offers a rare and engaging look into our fascination with the deep sea and into the origins of oceanography origins still visible in a science that focuses the efforts of physicists chemists geologists biologists and engineers on the common enterprise of understanding a vast three dimensional alien space Rozwadowski greatly expands our own understanding all while telling a story that is original wide ranging and illuminating Margaret Deacon Southampton Oceanography Centre author of Science and the Sea The Origins of Oceanography Required reading for anyone wanting to understand how the oceans have come to play the role that they do in Western knowledge Eric L Mills Dalhousie University and author of Biological Oceanography An Early History 1870 1960 Chronicles the birth of deep sea oceanography from early observations by Benjamin Franklin to the voyage of HMS Challenger in the 1870s Rozwadowski weaves a rich narrative from the world of renowned as well as lesser known oceanographers Nature [Insuring Security](#) Luis Lobo-Guerrero,2010-10-04 This book offers a genealogical interrogation of the relationship between security and risk through its materialisation in insurance **Eighteenth-Century Environmental Humanities** Jeremy Chow,2022-11-11 This groundbreaking interdisciplinary collection demonstrates how eighteenth century studies can be taught through the lens of the environmental humanities Activating topics such as climate change new materialisms the blue humanities indigeneity and decoloniality and green utopianism to interpret eighteenth century literature and culture each essay includes recommendations for innovative teaching and learning **Human Rights and Ocean Governance** Mara Ntona,2023-12-12 This book argues for the utility of human rights in the practice of ocean governance Maritime spatial planning MSP has become the dominant marine management paradigm with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states However as experience with MSP accrues a central systemic shortcoming has become apparent insofar as the normative frameworks that

underpin MSP tend to be grounded in a rationalistic and economistic worldview The result is a post political neoliberal approach to the implementation of MSP which favours technocratic fixes to complex societal problems over efforts to address underlying issues of power and inequality Building upon the new field of critical MSP studies this book offers a much neglected legal contribution More specifically it analyses the extent to which law and particularly human rights law can be utilised to meaningfully challenge the unjust patterns of human ocean interaction that MSP preserves or creates and so provide a vehicle for the formulation and realisation of transformative blue futures The book looks to human rights as norms that are uniquely capable of bringing into relief the values cause and effect relationships and uncertainties that prevailing capitalist industrial framings of the ocean tend to downplay or worse disregard And so from a more pragmatic viewpoint the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human ocean interaction which are more conducive to social and environmental justice This book will be of interest to legal and planning scholars geographers and others concerned with ocean governance and the blue turn in the social sciences and humanities more generally

Prospecting Ocean Stefanie Hessler, 2019-12-17 Investigating the entanglement of industry politics culture and economics at the frontier of ocean excavations through an innovative union of art and science The oceans are crucial to the planet s well being They help regulate the global carbon cycle support the resilience of ecosystems and provide livelihoods for communities The oceans as guardians of planetary health are threatened by many forces including growing extractivist practices Through the innovative lens of artistic research *Prospecting Ocean* investigates the entanglement of industry politics culture and economics at the frontier of ocean excavation The result is a richly illustrated study that unites science and art to examine the ecological cultural philosophical and aesthetic reverberations of this current threat to the oceans *Prospecting Oceans* takes as its starting point an exhibition by the photographer and filmmaker Armin Linke which was commissioned by TBA21 Academy London and first shown at the Institute of Marine Science CNR ISMAR in Venice Linke is concerned with making the invisible visible and here he unmasks the technologies that enable extractions from the ocean including future seabed mining for minerals and sampling of genetic data But the book extends far beyond Linke s research presenting the latest research from a variety of fields and employing art as the place where disciplines can converge Integrating the work of artists with scientific theoretical and philosophical analysis *Prospecting Ocean* demonstrates that visual culture offers new and urgent perspectives on ecological crises

Marine Geography Barbara Bischof, 2025-02-06 *Marine Geography Ocean Space and Sense of Place* offers an innovative and comprehensive exploration of ocean spaces through the lens of geographic thought establishing marine geography as a unique subdiscipline It addresses the historical neglect of oceans in geography providing core theories and approaches that can be applied to address geographic issues unique to this space such as fisheries blue economies coastal development and management mobilities and shipping and maritime governance Expanding traditional geographic concepts and incorporating

the more than human elements inherent to this space this work tweaks ways that geographic analysis can be applied to ocean systems in meaningful ways This book explores mapping techniques and lays out the physical dynamics and scientific models that provide the contextual realities with which we engage these complex environments and explores how our land based perspectives shape our interactions with the marine world It assembles the innovative theoretical geographical frameworks being applied to address ocean spaces and provides the building blocks for establishing an ocean point of view Filled with practical examples and foundational theories this book serves as a vital resource for students researchers and anyone interested in bridging the gap between marine science and geography Offers ways to define ocean geographies from within contexts of ocean systems rather than a view from land that is simply extended seaward Establishes a strategy to adapt or reframe core theories in both human and physical geography and proposes a start to a formal subdiscipline of marine and coastal geography Provides a picture of geographic features unique to ocean systems and lays the foundation for a distinct geography of marine spaces with which to confront issues in oceans natural resource management marine science and exploration communication and trade boundaries governance etc

The Security of Sea Lanes of Communication in the Indian Ocean Region Dennis Rumley, Sanjay Chaturvedi, Mat Taib Yasin, 2016-03-31 First published in 2007 this book focuses on the security of sea lanes of communication It was a joint publication between the Maritime Institute of Malaysia MIMA and the Indian Ocean Research Group IORG and is an important book for three particular reasons First it takes a step forward in identifying key policy themes that can be applied to interstate cooperation around the Indian Ocean Region IOR Second the particular theme discussed is not only central to the economic well being of Indian Ocean countries but also to many of the world's most important trading states and finally the various discussions within the book raise a host of issues to which regional as well as non regional policy makers should give serious consideration

American Sea Literature: Seascapes, Beach Narratives, and Underwater Explorations S. Yamashiro, 2014-07-31 Implementing a never before seen approach to sea literature American Sea Literature Seascapes Beach Narratives and Underwater Explorations explores the role of American maritime activities and their cultural representations in literature Differentiating between the terrestrial and oceanic as concepts Shin Yamashiro divides sea literature into three categories literature on the sea by the sea and beneath the sea Discussing both canonical works and new books on scuba diving deep sea explorations and surfing this fascinating study recognizes sea literature's unique influence on American history

Tracks on the Ocean Sara Caputo, 2024-10-22 An engaging look at ocean routes complicated beginnings and elusive impact Sara Caputo's Tracks on the Ocean is a sweeping history of how we have understood routes of travel over the ocean and how we came to represent that movement as a cartographical line Focusing on the representation of sea journeys in the Western world from the early sixteenth century to the present Caputo deftly argues that the depiction of these lines is inextricable from European imperialism the rise of modernity and attempts at mastery over nature Caputo recounts the history of ocean tracks through

an array of lively stories and characters from the expeditions of Captain James Cook in the eighteenth century to tracks depicted in *Moby Dick* and popular culture of the nineteenth century to the use of navigational techniques by the British navy. She discusses how tracks evolved from tools of surveying into tools of surveillance and eventually into paths of environmental calamity. The impulse to record tracks on the ocean, Caputo argues, is reflective of an ongoing desire for order, schematization, and personal visibility, as well as occupation and permanent ownership in this case over something that is unoccupiable and impossible to truly possess. Both beautifully written and deeply researched, *Tracks on the Ocean* shares how the lines drawn on maps tell the audacious and often tragic and violent stories of ocean voyages.
