Shamis,2017-10-11 The Media Environment of Political Thought offers a novel way of looking at the tradition of political thought by reconstructing the historical media landscapes in which great political texts of the past were produced It brings to light the little charted media environments in which two political innovators Jean Jacques Rousseau and Karl Marx operated and analyzes both how writing systems shaped their intellectual growth and how they used those systems to communicate their pioneering ideas The historical analysis is followed by a critical reflection on the future of political thought in the age of computer mediated communication Together the three studies presented in the book conjure up a view of the tradition of political thought as highly regulated stream of information shaped by historical writing systems **A Justice-Based**

debates in journalism studies and grounded in empirical research Heinrich here analyzes the interplay between journalistic practice and processes of globalization and digitalization She argues that a new kind of journalism is emerging characterized by an increasingly global flow of news as well as a growing number of news deliverers Within this transformed news sphere the roles of journalistic outlets change They become nodes arranged in a dense net of information gatherers producers and disseminators The interactive connections among these news providers constitute what Heinrich calls the sphere of network

journalism     *Letters, Postcards, Email* Esther Milne, 2012-02-27 In this original study Milne moves between close readings of letters postcards and emails and investigations of the material technological infrastructures of these forms to answer the question How does presence function as an aesthetic and rhetorical strategy within networked communication practices As her work reveals the relation between old and new communication systems is more complex than allowed in much contemporary media theory Although the correspondents of letters postcards and emails are not usually present to one another as they write and read their exchanges this does not necessarily inhibit affective communication Indeed this study demonstrates how physical absence may in some instances provide correspondents with intense intimacy and a spiritual almost telepathic sense of the other s presence While corresponding by letter postcard or email readers construe an imaginary incorporeal body for their correspondents that in turn reworks their interlocutor s self presentation In this regard the fantasy of presence reveals a key paradox of cultural communication namely that material signifiers can be used to produce the experience of incorporeal presence     *Dictionary of Media and Communication Studies* James Watson, Anne Hill, 2015-10-22 A comprehensive lexicon of all aspects of the study of interpersonal group mass communication and the world of internet communication     **The Routledge Companion to British Media History** Martin Conboy, John Steel, 2014-09-15 The Routledge Companion to British Media History provides a comprehensive exploration of how different media have evolved within social regional and national contexts The 50 chapters in this volume written by an outstanding team of internationally respected scholars bring together current debates and issues within media history in this era of rapid change and also provide students and researchers with an essential collection of comparable media histories The Routledge Companion to British Media History provides an essential guide to key ideas issues concepts and debates in the field Chapter 40 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license [https://www.routledgehandbooks.com/doi/10.4324/9781315756202\\_ch40](https://www.routledgehandbooks.com/doi/10.4324/9781315756202_ch40)     **A Dictionary of Media and Communication** Daniel Chandler, Rod Munday, 2011-02-10 This new dictionary includes over 2 200 concise accessible and extensively cross referenced entries for terms regularly encountered by students and professionals working within the diverse fields of media and communication studies including advertising digital culture new media telecommunications and visual culture     Mediated Communication Philip M. Napoli, 2018-09-24 Media scholarship has responded to a rapidly evolving media environment that has challenged existing theories and methods while also giving rise to new theoretical and methodological approaches This volume explores the state of contemporary media research Focusing on Intellectual Foundations Theoretical Perspectives Methodological Approaches Context and Contemporary Issues this volume is a valuable resource for media scholars and students     **The Periodical Press Revolution** Graham Law, 2023-12-01 This book explores a key aspect of journalism history from a sociological perspective the rise of the periodical press With a focus not on the economic and technological causes of this revolution but on the social and political

consequences the book takes a global look at this key development in the British press Taking as a point of departure the theory of E S Dallas who defined the periodical as the great event in modern history the book explores these premises and conclusions regarding authorship publishing and readership considering the nineteenth century as a whole After an introductory section discussing questions of theory and method the analysis first offers an overview of the quantitative growth of the periodical market whether measured in terms of publications readership or authorship before turning to a more detailed consideration of its qualitative determinants and effects again distinguishing the same three aspects Offering new insight into this key turning point in journalism history this book will be of interest to all students and scholars of journalism and journalism history media history media and communication studies British history and modern history

**The Republic of Games** Elyse Graham, 2018-05-15 Many of today's digital platforms are designed according to the same model they encourage users to create content for fun a mode of production that some have termed playbour and to earn points On Facebook for example points are based on a user's number of friends and how many likes and shares a comment receives New cultural and literary formations have arisen out of these feedback and reward systems with surprising effects on amateur literary production Drawing on social text analysis platform studies and game studies Elyse Graham shows that embedding game structures in the operations of digital platforms a practice known in corporate circles as gamification can have large cumulative effects on textual ecosystems Making the production of content feel like play helps to drive up the volume of text being written and as a result gamification has gained widespread popularity online especially among social media platforms fan forums and other sites of user generated content The Republic of Games argues that a consequence of this profound increase in the volume of text being produced is a reliance on self contained user based systems of information management to deal with the mass of new content Opening up new avenues of analysis in contemporary media studies and the humanities The Republic of Games sifts through the gamified patterns of writing interacting and meaning making that define the digital revolution

**Personal Connections in the Digital Age** Nancy K. Baym, 2015-08-04 The internet and the mobile phone have disrupted many of our conventional understandings of ourselves and our relationships raising anxieties and hopes about their effects on our lives In this second edition of her timely and vibrant book Nancy Baym provides frameworks for thinking critically about the roles of digital media in personal relationships Rather than providing exuberant accounts or cautionary tales it offers a data grounded primer on how to make sense of these important changes in relational life Fully updated to reflect new developments in technology and digital scholarship the book identifies the core relational issues these media disturb and shows how our talk about them echoes historical discussions about earlier communication technologies Chapters explore how we use mediated language and nonverbal behavior to develop and maintain communities social networks and new relationships and to maintain existing relationships in our everyday lives The book combines research findings with lively examples to address questions such as Can mediated interaction be warm and personal Are

people honest about themselves online Can relationships that start online work Do digital media damage the other relationships in our lives Throughout the book argues that these questions must be answered with firm understandings of media qualities and the social and personal contexts in which they are developed and used This new edition of Personal Connections in the Digital Age will be required reading for all students and scholars of media communication studies and sociology as well as all those who want a richer understanding of digital media and everyday life      **Comparing Post-Socialist Media Systems** Zrinjka Peruško, Dina Vozab, Antonija Čuvalo, 2020-10-04 This book explains divergent media system trajectories in the countries in southeast Europe and challenges the presumption that the common socialist experience critically influences a common outcome in media development after democratic transformations by showing different remote and proximate configuration of conditions that influence their contemporary shape Applying an innovative longitudinal set theoretical methodological approach the book contributes to the theory of media systems with a novel theoretical framework for the comparative analysis of post socialist media systems This theory builds on the theory of historical institutionalism and the notion of critical junctures and path dependency in searching for an explanation for similarities or differences among media systems in the Eastern European region Extending the understanding of media systems beyond a political journalism focus this book is a valuable contribution to the literature on comparative media systems in the areas of media systems studies political science Southeast and Central European studies post socialist studies and communication studies
