Social Life Of Avatars:

The Social Life of Avatars Ralph Schroeder, 2002-01-10 Virtual reality technology has been developed commercially since the early 1990s but it is only recently with the popularity of the internet that it has become feasible to link many users simultaneously in shared virtual environments This raises a number of interesting questions such as what is the difference between face to face and avatar to avatar interaction What patterns govern the formation of virtual communities How does the appearance of the avatar change the nature of the communication There has been much speculation about issues such as these but research is still at a relatively early stage This is the first book to bring together work from relevant disciplines to form a reference guide for practitioners students and researchers interested in how we interact in computer generated environments It contains contributions from most of the key people in this area including Microsoft Research's Virtual Worlds Group and presents their findings in a way which is accessible to readers who are new to this field or who come from related areas It is divided into 2 parts chapters 2-6 deal with internet based virtual worlds which have been widely used by the public chapters 7-10 deal with networked VR systems which have been primarily used in pilot studies and research Some chapters take the viewpoint of a participant observer whilst others take a more experimental approach and assess the results of relevant trials This book will be essential reading for anyone involved in developing using or researching virtual worlds and will also be of interest to students on courses such as VR and Computer mediated communication

The Social Life of Avatars Ralph Schroeder, 2012-12-06 Virtual reality VR technology has been developed commercially since the early 1990s 1 Yet it is only with the growth of the Internet and other high bandwidth links that VR systems have increasingly become networked to allow users to share the same virtual environment VE Shared YEs raise a number of interesting questions what is the difference between face to face interaction and interaction between persons inside YEs How does the appearance of the avatar as the graphical representation of the user has become known change the nature of interaction And what governs the formation of virtual communities This volume brings together contributions from social scientists and computer scientists who have conducted research on social interaction in various types of YEs Two previous volumes in this CSCW book series 2 3 have examined related aspects of research on YEs social navigation and collaboration although they do not always deal with VRIVEs in the sense that it is used here see the definition in Chapter 1 The aim of this volume is to explore how people interact with each other in computer generated virtual worlds

Being There Together Ralph Schroeder, 2010-11-04 Virtual environments provide places for being there together for avatars to interact with each other in computer generated spaces They range from immersive systems in which people have life size tracked avatar bodies to large scale spaces such as Second Life where populations of users socialize in persistent virtual worlds This book draws together research on how people interact in virtual environments What difference does avatar appearance make How do avatars collaborate and play together How do the type of system and the space affect how people engage with each other How does interaction between

avatars differ from face to face interaction What can social scientists learn from experiments and other studies of how people interact in virtual environments What are the ethical and social issues in doing this research and in the uses of this technology And how do virtual environments differ from other communication technologies such as videoconferencing systems and other new media This book is a state of the art survey of research on these topics and offers a framework for understanding this technology and its future implications *Avatars at Work and Play* Ralph Schroeder, Ann-Sofie Axelsson, 2006-02-06 Avatars at Work and Play brings together contributions from leading social scientists and computer scientists who have conducted research on virtual environments used for collaboration and online gaming They present a well rounded and state of the art overview of current applications of multi user virtual environments ranging from highly immersive virtual reality systems to internet based virtual environments on personal computers The volume is a follow up to a previous essay collection The Social Life of Avatars which explored general issues in this field This collection goes further examining uses of shared virtual environments in practical settings such as scientific collaboration distributed meetings building models together and others It also covers online gaming in virtual environments which has attracted hundreds of thousands of users and presents an opportunity for studying a myriad of social issues Covering both work and play the volume brings together issues common to the two areas including What kind of avatar appearance is suitable for different kinds of interaction How best to foster collaboration and promote usable shared virtual spaces What kinds of activities work well in different types of virtual environments and systems The Handbook of the Psychology of Communication Technology S. Shyam Sundar, 2015-01-20 The Handbook of the Psychology of Communication Technology offers an unparalleled source for seminal and cutting edge research on the psychological aspects of communicating with and via emergent media technologies with leading scholars providing insights that advance our knowledge on human technology interactions A uniquely focused review of extensive research on technology and digital media from a psychological perspective Authoritative chapters by leading scholars studying psychological aspects of communication technologies Covers all forms of media from Smartphones to Robotics from Social Media to Virtual Reality Explores the psychology behind our use and abuse of modern communication technologies New theories and empirical findings about ways in which our lives are transformed by digital media *Handbook of Research on Human Performance and Instructional Technology* Song, Holim, Kidd, Terry T., 2009-10-31 This book addresses the connection between human performance and instructional technology with teaching and learning offering innovative ideas for instructional technology applications and elearning Provided by publisher **Reinventing Ourselves: Contemporary Concepts of Identity in Virtual Worlds** Anna Peachey, Mark Childs, 2011-07-07 The proposed book explores the theme of identity specifically as applied to its role and development in virtual worlds Following the introduction it is divided into four sections identities avatars and the relationship between them factors that support the development of identity in virtual worlds managing multiple identities across different

environments and creating an online identity for a physical world purpose

The SAGE Handbook of Online Research Methods Nigel G Fielding, Raymond M Lee, Grant Blank, 2008-06-24 This handbook is the first to provide comprehensive up to the minute coverage of contemporary and developing Internet and online social research methods spanning both quantitative and qualitative research applications The editors have brought together leading names in the field of online research to give a thoroughly up to date practical coverage richly illustrated with examples The chapters cover both methodological and procedural themes offering readers a sophisticated treatment of the practice and uses of Internet and online research that is grounded in the principles of research methodology Beginning with an examination of the significance of the Internet as a research medium the book goes on to cover research design data capture online surveys virtual ethnography and the internet as an archival resource and concludes by looking at potential directions for the future of Internet and online research The SAGE Handbook of Internet and Online Research Methods will be welcomed by anyone interested in the contemporary practice of computer mediated research and scholarship Postgraduates researchers and methodologists from disciplines across the social sciences will find this an invaluable source of reference

Avatars, Activism and Postdigital Performance Liam Jarvis, Karen Savage, 2021-11-18 In the context of the postdigital age where technology is increasingly part of our social and political world Avatars Activism and Postdigital Performance traces how identity can be created developed hijacked manipulated sabotaged and explored through performance in postdigital cultures Considering how technology is reshaping performance this timely collection reveals how we engage in performance practices through expanded notions of intermediality knotted networks and layering This book examines the artist as activist and producer of avatars and how digital doubles artificial intelligence and semi automated politics are problematizing and expanding our discussions of identity Using a range of examples in theatre film and internet based performance practices chapters examine the uncertain boundaries of networked informational selves in mediatized cultures the impacts of machine algorithms apps and the consequences of digital legacies Case studies include James Cameron s Avatar Blast Theory s Karen Ontroerend Goed s A Game of You Randy Rainbow s online videos Sisters Grimm s Calpurnia Descending Dead Centre s Lippy and Chekhov s First Play and Jo Scott s practice as research in place mixing This is an incisive study for scholars students and practitioners interested in the wider conversations around identity formation in postdigital cultures

At the Threshold of the Image Andrea Pinotti, 2025-09-16 An exploration of the impact of immersive experiences on visual practices from cave painting to virtual reality In this groundbreaking book philosopher Andrea Pinotti explores the impacts of a desire that has motivated human beings since prehistory the desire to enter an

image He proposes that over the centuries every culture has tried to realize this wish with whatever visual resources were available at the time and today's virtual reality technologies seem close to fulfilling it The image in VR becomes an immersive 360 degree environment and the frame that used to confine it to a world apart disappears Even the physical medium in which the image materializes appears to be transparent However Pinotti insists that once the border between the real world and the iconic world becomes permeable we are faced with a troubling two way passage we penetrate the world of the image but the image floods into our world The desire for being encompassed by the image he shows is accompanied by fear of this overflowing In its analysis of this desire fear At the Threshold of the Image takes the reader on an extraordinary journey from the myths of Narcissus and Pygmalion to contemporary VR headsets passing through the pictorial traditions of trompe l'oeil and living sculptures the mirrors in Alice in Wonderland illusionistic architecture panoramas and phantasmagorias and 3D cinema
