poor the offenders and the unadaptable categories policymakers use to talk about material need recipients are linked pathologically with criminality abuse of the system and other negative perceptions This is a must read text for anyone interested in how political actors justify questionable legislation that cements inequality in today s neoliberal milieu B Nadya Jaworsky Associate Professor Sociology Masaryk University Czech Republic Lenka Kissov s book is clearly written and carefully researched Her interdisciplinary insight and discursive analysis of parliamentary debates on Slovak workfare policies illustrates the deliberate precise and politicized colocation of Roma marginalization and economic disadvantage in a manner that starkly illustrates systemic racism dressed up as morally necessary regulatory reform Moreover her research has broader comparative and methodological relevance given how she layers in and utilizes governmentality securitization and legitimation theory unmasking how neoliberal economic assumptions and dog whistle politics woven into the speech of politicians works to demonize recipients as real or potential cheats and criminals enact further social exclusion and heighten inequality and fear while not so subtly promoting existing prejudices Her overarching metaphor that of parliamentarians engaging in political farming where their ideas seed and take root in fertile soil of the national landscape resulting in regulatory products effectively demonstrates how social reality generally and state regulation specifically can be constructed divorced from actual evidence a process beyond her specific case and critically relevant to our times Barbara J Falk Professor Department of Defence Studies Canadian Forces College Royal Military College of Canada Fellow Centre for European Russian and Eurasian Studies University of Toronto Canada

that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research Interpretation extends from the very framing of the research task through the sources which constitute the data the process of their recording representation and analysis to the way in which the research is finally or provisionally presented The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled *p dagogisch* examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with consideration of the role of interpretation in the process The handbook includes examples of a large number of methods traditionally classified as qualitative interpretive and quantitative used across the area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies
