Neurobiology

for Clinical Social Work: Theory and Practice (Norton Series on Interpersonal Neurobiology) Jeffrey S.

Applegate, Janet R. Shapiro, 2005-08-17 The last fifteen years have produced an explosion of research on the neurobiology of attachment. This research, which explores the ways in which affect regulation plays key roles in determining the structure and function of the developing brain and mind, has led to a revolution in the way that parent-child relationships are viewed. Although these insights have informed psychiatry as well as cognitive and psychoanalytic psychology, their application to social work practice, education, and research has been lacking. Here, for the first time ever, social work educators Jeffrey Applegate and Janet Shapiro demystify neurobiology and present it anew with the social work audience specifically in mind. Social workers, by virtue of their work with at-risk children and families, occupy a unique position from which to employ this new research in prevention and intervention. This lack of education about neurobiology has unfortunately fostered misconceptions among social workers that these theories are too academic and thus irrelevant to clinical practice. *Neurobiology for Clinical Social Work* corrects this misconception and introduces social workers to the powerful and practical ideas that are coming out of neurobiological research. The research summarized here offers new insights about the crucial role that relationships play in human development and in professional helping efforts. To set the stage for this inquiry, the authors introduce fundamentals of brain structure, development, and functioning in the first parts of the book. This introduction is intended as a primer and proceeds from the assumption that many readers are relatively unfamiliar with the field of brain science. Building on this foundation, the authors go on to describe the manner in which memory and affect regulation are neuropsychological processes. The next chapters of the book delve into the concepts of attachment. Specifically, the authors are concerned with how precursors to attachment evolve during the earliest months of an infant's life and how various attachment classifications—secure, insecure, disorganized—lead to affect regulation, the ability of a child to regulate emotion. Throughout the book, these concepts are discussed in the context of what social workers face when trying to find explanatory structures for the ways in which early childhood experiences affect later life. Later chapters turn even more directly toward practice. Using case examples, including adolescent parents and their children, children with a depressed parent, and children of substance-abusing parents, Applegate and Shapiro show clinicians how to make use of neurobiological concepts in designing treatment plans and interventions. One chapter contains three extended case examples with commentary representing the three most common intervention models taught in schools of social work: psychodynamic, cognitive-behavioral, and systemic. Various settings, such as community mental health, family service agencies, and child welfare, are also discussed. In order to be effective and meet the complex challenges of the twenty-first century, social work professionals must join with their colleagues in other disciplines in coordinated efforts to integrate and apply newly emerging

knowledge toward the enhancement of human well being Neurobiology for Clinical Social Work is a great place to start this process of integration and learning Adult Social Care Law in England John Williams,Gwyneth Roberts,Aled Griffiths,2014-07-08 Social work law is at the foundation of all social work practice from shaping professional boundaries to determining the level of intervention Every case is complex and unique and therefore requires different legal treatment this means it is absolutely vital that social workers not only understand the law but are able to critically analyse the legal framework and apply it to their practice This book provides students and practitioners with an essential guide to adult social care law It lays out the key case law core legislation and the HSPCC standards as they apply to different areas of adult social care This includes issues of capacity making an assessment supporting carers and working with vulnerable adults Designed to support learning needs the book is packed with engaging case studies and reflective exercises as well as a legal toolbox to help simplify the legal jargon Whether you are a student or practitioner this is a practical accessible guide to competent and lawful practice in adult social care *Exploring New Horizons for Decolonial Social Work Education* Carolyn Noble,Annaline Caroline Sandra Keet,2024-11-01 This book presents current scholarship designed to decolonize reform and confront the Euro centric dominance in social work education and practice This compact volume strings together new content from internationally recognised authors in the field of social work to address this need Decolonising social work seeks to weaken the effect of colonialism and create opportunities to promote traditional practices in contemporary settings Its focus is to draw attention to the effects of globalisation and the universalization of social work education methods of practice and international development that fail to embrace and recognise local knowledges and methods by bringing new and fresh perspectives to social work It can also be seen as a significant contribution to social work s more critical stance and long standing struggle to challenge the hegemonic Euro centric epistemology With decoloniality becoming a global imperative this collection brings together case studies from world scholars and decolonial voices in order to explore opportunities challenges and trends to decolonize through culturally relevant curricula including Social Work and Decolonisation Student Social Workers Understanding of the Concepts of Culture Cultural Identity and Decolonisation Developing Curriculum for Criminal Justice Social Work from the Field New Directions in Trauma Work Cultural Trauma Theory as an Instrument to Contextualise and Address Histories of Pain in Global Communities Analysing and Understanding Intersections Using Nayak s Intersectional Model of Reflection in Social Work Teaching Decolonizing Social Work Education and Curriculum Utilizing Cultural Competemility and Professionalism Approach Exploring New Horizons for Decolonial Social Work Education is essential reading for practitioners policy makers instructors researchers and other social work professionals The book may be used as a supplemental text for social work courses The national and international focus of the volume will be highly relevant to all social work programmes across the globe *Podcasting in Social Work Education* Mim Fox,Jonathan B.
