Encompassing the time period from the colonial era to the present day this book critically examines the changing nature of African politics and the factors that underpin such changes We argue in the volume that many of the problems that plague contemporary politics ethnicity governance conflict bad economic policies the absence of dialogue and other social issues have their roots in the fifteen years after the Second World War just prior to independence 1945 1960 Because these issues had been grossly mismanaged by the colonial enterprise those fifteen years could arguably be characterized as the incubation period for the dysfunction that has stymied African politics since independence For it was during these transitional years that African leaders learned how not to speak to each other How to introduce meaningful dialogue to address issues between and among Africans is where the transition in African politics stands today The approach used here is interdisciplinary giving the book a wider appeal to those interested in history political science peace and conflict studies international relations and many disciplines Additionally the topics covered are so important and intellectual and have been penned by an A team of African scholars that other scholars students and professionals can use the volume as a reference text Therefore college students both undergraduate and graduate college instructors researchers policy makers and the development community working to stabilize Africa will find the book to be of immense importance Furthermore this volume will serve as a guide for advocates for the development community on how to address the numerous problems affecting the continent as well as the correct approach to boosting public awareness about contemporary African issues The SAGE Encyclopedia of World Poverty Mehmet Odekon, 2015-06-15 The SAGE Encyclopedia of World Poverty Second Edition addresses the persistence of poverty across the globe while updating and expanding the landmark work Encyclopedia of World Poverty originally published in 2006 prior to the economic calamities of 2008 For instance while continued high rates of income inequality might be unsurprising in developing countries such as Mexico the Organization of Economic Co operation and Development OECD reported in May 2013 even countries with historically low levels of income inequality have experienced significant increases over the past decade including Denmark Sweden and Germany The U N and the World Bank also emphasize the persistent nature of the problem It is not all bad news In March 2013 the Guardian newspaper reported Some of the poorest people in the world are becoming significantly less poor according to a groundbreaking academic study which has taken a new approach to measuring deprivation The report by Oxford University s poverty and human development initiative predicts that countries among the most impoverished in the world could see acute poverty eradicated within 20 years if they continue at present rates On the other hand the U N says environmental threats from climate change could push billions more into extreme poverty in coming decades All of these points lead to the need for a

revised updated and expanded edition of the Encyclopedia of World Poverty Key Features 775 evaluated and updated and 175 entirely new entries New Reader s Guide categories Signed articles with cross references Further Readings will be accompanied by pedagogical elements Updated Chronology Resource Guide Glossary and thorough new Index The SAGE Encyclopedia of World Poverty Second Edition is a dependable source for students and researchers who are researching world poverty making it a must have reference for all academic libraries

**The Charitable Crescent** Jonathan Benthall, Jérôme Bellion-Jourdan, 2003-08-22 Islamic Charity Under Suspicion such headlines have become familiar since the attacks on the United States on 9/11 The Charitable Crescent is a unique and original account of a hitherto little known field of pivotal significance to our understanding of the Muslim world today the relationship between politics and philanthropy in the workings of Islamic charities Based on years of research Jonathan Benthall and Jerome Bellion Jourdan explain the long tradition of philanthropy in Muslim history and how it is constantly adapted to differing political contexts

The pervasive connections between charity and politics in the Middle East demonstrate how naive it is to think of humanitarianism as a sphere distinct from politics. The Charitable Crescent covers all aspects of this topic that has become so relevant in today's world: who is entitled to benefit from Muslim alms? Can material relief aid be de-linked from political or sometimes even violent action? How can public trust both Western and Islamic in welfare delivery systems be won? Who is entitled to interpret Islamic doctrine? Is there one universal tradition of humanitarianism or many traditions defined by cultural history? This book offers rich practical insights highly relevant to today's highly tense international climate and also encourages the reader to challenge the common Western assumption that we are the exclusive providers of aid to rescue a passive Third World. Interesting, rewarding and timely: this is an important book. Caroline Moorhead. The Origins of the Libyan Nation Anna Baldinetti, 2014-05-12. Libya is a typical example of a colonial or external creation. This book addresses the emergence and construction of nation and nationalism particularly among Libyan exiles in the Mediterranean region. It charts the rise of nationalism from the colonial era and shows how it developed through an external Libyan diaspora and the influence of Arab nationalism. From 1911 following the Italian occupation the first nucleus of Libyan nationalism formed through the activities of Libyan exiles. Through experiences undergone during periods of exile new structures of loyalty and solidarity were formed. The new and emerging social groups were largely responsible for creating the associations that ultimately led to the formation of political parties at the eve of independence. Exploring the influence of colonial rule and external factors on the creation of the state and national identity, this critical study not only provides a clear outline of how Libya was shaped through its borders and boundaries but also underlines the strong influence that Eastern Arab nationalism had on Libyan nationalism. An important contribution to history of Libya and nationalism, this work will be of interest to all scholars of African and Middle Eastern history. **Religions in Contemporary Africa** Laura S.
