Advancing Pluralism in Teaching Economics Samuel Decker,Wolfram Elsner,Svenja Flechtner,2018-09-03

The complex economic problems of the 21st century require a pluralist real world oriented and innovative discipline of economics

that is capable of addressing and teaching these issues to students This volume is a state of the art compilation of diverse innovative and international perspectives on the rationales for and pathways towards pluralist economics teaching It fosters constructive controversy aiming to incite authors and commentators to engage in fruitful debates This volume addresses a number of key questions Why is it important for a social science to engage in pluralistic teaching What issues does pluralist teaching face in different national contexts Which traditions and practices in economic teaching make pluralist teaching difficult What makes economics as a canonical textbook science particular and how could the rigid textbook system be innovated in a meaningful way What can we learn from school education and other social science disciplines Through examining these issues the editors have created a pluralist but cohesive book on teaching economics in the contemporary classroom drawing from ideas and examples from around the world Advancing Pluralism in Teaching Economics offers a valuable insight into the methodology and application of pluralist economics teaching It will be a great resource for those teaching economics at various levels as well as researchers

The Oxford Handbook of Computational Economics and Finance Shu-Heng Chen, Mak Kaboudan, Ye-Rong Du, 2018 The Oxford Handbook of Computational Economics and Finance provides a survey of both the foundations of and recent advances in the frontiers of analysis and action It is both historically and interdisciplinarily rich and also tightly connected to the rise of digital society It begins with the conventional view of computational economics including recent algorithmic development in computing rational expectations volatility and general equilibrium It then moves from traditional computing in economics and finance to recent developments in natural computing including applications of nature inspired intelligence genetic programming swarm intelligence and fuzzy logic Also examined are recent developments of network and agent based computing in economics How these approaches are applied is examined in chapters on such subjects as trading robots and automated markets The last part deals with the epistemology of simulation in its trinity form with the integration of simulation computation and dynamics Distinctive is the focus on natural computationalism and the examination of the implications of intelligent machines for the future of computational economics and finance Not merely individual robots but whole integrated systems are extending their immigration to the world of Homo sapiens or symbiogenesis

Understanding Social Dynamics in South Asia Partha Nath Mukherji, N. Jayaram, Bhola Nath Ghosh, 2019-02-26 This volume includes fourteen essays by eminent sociologists in memory of Ramkrishna Mukherjee 1919-2017 the last of the founding architects of sociology in India It also includes two interviews with Ramkrishna Mukherjee by senior sociologists The essays cover a variety of themes and topics close to the works of Ramkrishna Mukherjee the idea of unitary social science methodology of social research the question of facts and values rural society and social change social mobility family and gender and nationalism In the two interviews included here Mukherjee clarifies his intellectual trajectory as well as issues of methodology and methods in social research Overall this volume endorses his emphasis on the need for social researchers to transcend the what and how to why in the pursuit of sociological knowledge The volume is a

valuable addition to the history of sociology in India Students of sociology and other social sciences will find it useful as a book of substantive readings on social dynamics those researching the social world will find in it a useful guide to issues in designing and execution of social research projects

Non-natural Social Science Neil De Marchi, 1993 Published in 1989 Philip Mirowski's *More Heat Than Light* Economics as Social Physics Physics as Nature's Economics offered a challenge to historians of economics that could not be ignored Neo classical economics he said adopted certain analytical tools of mid nineteenth century physics simply substituting utility for energy and in so doing chose a natural world model which denied that economic knowledge might be essentially social and cultural The essays in this collection represent the first collective effort to respond to Mirowski's challenge by examining and assessing the Mirowski enterprise In addition to questioning the veracity of the connection between physics and economics the contributors consider the far reaching implications of Mirowski's thesis for the history of economics Mirowski shows that economic texts must be viewed in their relation to texts outside the field of economics and offers an alternative reading of economic texts as social and cultural inscriptions As historians of economics respond to Mirowski's challenge the style and direction of their work will be changed Ultimately a careful assessment of *More Heat Than Light* may introduce historians of economics to recognize that the discipline of economics may not be the most appropriate category from which to proceed Contributors Jack Birner Marcel Boumans A W Coats Avi J Cohen I Bernard Cohen Neil de Marchi Steve Fuller Clifford G Gaddy Wade Hands Albert Jolink Arjo Klammer Robert Leonard Philip Mirowski Theodore M Porter Margaret Schabas E Roy Weintraub

Social Accounting Systems M. Yanovsky, Social accounting grew up as a result of the desire to bring together in a meaningful and comprehensive manner all the available observed facts on the economic and financial activity of a nation Three social accounting systems of flow have been developed during the last three decades Each of these systems has been constructed separately and independently The framework of each system is constructed to tackle specific aspects of the national economy It is also designed in a manner which helps in framing policies for future activity The aim of this book is mainly to describe the anatomy of these three social accounting systems and compare their structures Some attention is also given to a comparison of the systems in actual use by some industrially developed countries including the centralized economies The problem of integrating the three systems is also cursorily treated The student of economics and the economist in the service of industry private or public will obtain from this book a picture of the concepts and definitions used in social accounting the book also describes how each system is constructed and which economic study or analysis it can best serve Another valuable feature is the comparison the author makes of the national accounts system with the Russian Nationalny Dokhod In this far reaching and complex work the author has brought together the fruits of his very extensive studies into the social accounting methods of many nations and he goes beyond the analysis of existing systems to suggest ways of tackling the problems of integrating the three main systems into one Dr Yanovsky is at present senior economist in the State Comptroller's Office in Israel He studied economics

in the Universities of Chicago and Manchester where he obtained his doctorate at the Department of Economics and Social Studies in 1963 It was from a thesis he wrote while in Manchester that he drew the inspiration and much of the material for this book
