disadvantaged It is a process requiring innovations in several disciplines technological social and business This book covers a number of areas First much of the current BoP discussion emphasises targeting products to the needs of the poor But do we actually know what the real needs of the poor are This book takes a bottom up human centred approach and examines examples that truly engage the poor in BoP product and service development What types of needs assessment methodologies are indicated considering the cultural differences in BoP countries Are the existing methodologies adequate Do they need to be redefined and redeveloped Second the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem Tragically the poor are hardest hit by the adverse effects of environmental deterioration such as water shortages climate change or the destruction of habitats While the economic welfare of the poor is critical the BoP approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability The link between the BoP approach and sustainable development is a key feature of this book Third it looks at innovation and asks what kinds ofbottom up innovation open source technological social and business support BoP initiatives and sustainable development Fourth the book deals with the relationship between development assistance and BoP Is a BoP strategy the antithesis to development aid or can these two co exist or even complement each other Finally the book raises questions about the relationship between corporate responsibility and BoP Is BoP a new form of corporate neo colonialism or a new form of corporate responsibility Although the BoP concept has unleashed an extensive and generally enthusiastic response from academics businesses NGOs and governments the knowledge domain around this concept is still in the early stages of development This book addresses that need with a focus on the needs of the end users the poor as a starting point for BoP products and innovations With contributions from both supporters and critics it provides a treasure trove of global knowledge on how the concept has developed what its successes and failures have been and what promise it holds as a long term strategy for alleviating poverty and tackling global sustainability *Strategies and Challenges of Sustainable Development in Eurasia* Anastassia Obydenkova,2024-04-30 This book examines the main environmental challenges and their management in post Soviet Eurasia and China It uncovers international national and subnational dimensions in sustainable development and aims to facilitate understanding of pressing environmental problems in the region While supporting the values and goals of sustainable development at the international level states might employ very different strategies at the national regional and local levels The goal of this edited book is twofold First it aims to advance our understanding of different strategies paying special attention to China and Russia at global national and sub national levels Thus analysis of their strategies across different levels presents a more rounded picture The second goal is to identify at least a few of the most pressing challenges of sustainable development across post Soviet Eurasia and China e g nuclear supply chain emissions environmental conflict management and to attempt to understand their triggers outcomes and potential solutions This book reflects the state of the art before the invasion in

Ukraine took place It aspires to develop a better dialogue across different sets of literature in area studies environmental politics and international relations to improve our understanding of obstacles to sustainable development in Eurasia The chapters in this book were originally published as a special issue of Post Communist Economies **The challenges facing agriculture in the twenty-first century. Speeches by the Director General during 2002** , **Conference proceedings. New perspectives in science education 7th edition** Pixel,2018-03-19 *Electronic Governance and Open Society: Challenges in Eurasia* Andrei V. Chugunov,Marijn Janssen,Igor Khodachek,Yuri Misnikov,Dmitrii Trutnev,2022-04-13 This book constitutes the refereed proceedings of the 8th Conference on Electronic Governance and Open Society Challenges in Eurasia EGOSE 2021 held in St Petersburg Russia in November 2021 The 21 full papers were carefully reviewed and selected from 69 submissions additionally one invited paper has been included in this volume The papers are organized in topical sections on digital technology and design digital Society digital government and economy Towards a New Development Paradigm in Twenty-first Century China Éric Florence,Pierre Defraigne,2013 This book argues that the current state of China requires an important paradigm shift in the way the party state manages the country s development and goes on to assess the fitness of the party state for implementing such a paradigm shift and the likelihood of the party state bringing this about It brings together an examination of the very latest situation in a range of key areas where current developments have the potential to undermine substantially the status quo areas such as the recent economic crisis and the resulting economic slowdown increasing labour unrest mounting calls for social justice worsening urban rural disparity the urgent need to implement social welfare programmes the rise of civil society and the impact of new media Overall the book provides a thorough appraisal of the difficulties which China currently faces
