***History and Social Theory*** Peter Burke, 1992 What is the use of social theory to historians and of history to social theorists In clear and energetic prose a pre eminent cultural historian here offers a far reaching response to these deceptively simple questions In this classic text now revised and updated in its second edition Peter Burke reviews afresh the relationship between the fields of history and the social sciences and their tentative convergence in recent decades Burke first examines what uses historians have made or might make of the models methods and concepts of the social sciences and then analyzes some of the intellectual conflicts such as the opposition between structure and human agency which are at the heart of the tension between history and social theory Throughout he draws from a broad range of cultures and periods to illustrate how history in turn has been used to create and

validate social theories This new edition brings the book up to date with the addition of examples and discussions of new topics such as social capital globalization and post colonialism The second edition of History and Social Theory will continue to stimulate both students and scholars across a range of disciplines with its challenging assessment of the roles of history and social science today

Logics of History William H. Sewell Jr., 2009-07-27 While social scientists and historians have been exchanging ideas for a long time they have never developed a proper dialogue about social theory William H Sewell Jr observes that on questions of theory the communication has been mostly one way from social science to history Logics of History argues that both history and the social sciences have something crucial to offer each other While historians do not think of themselves as theorists they know something social scientists do not how to think about the temporalities of social life On the other hand while social scientists treatments of temporality are usually clumsy their theoretical sophistication and penchant for structural accounts of social life could offer much to historians Renowned for his work at the crossroads of history sociology political science and anthropology Sewell argues that only by combining a more sophisticated understanding of historical time with a concern for larger theoretical questions can a satisfying social theory emerge In Logics of History he reveals the shape such an engagement could take some of the topics it could illuminate and how it might affect both sides of the disciplinary divide
