Social Use Of Information:

Communication in Social Work Joyce Lishman, 2020-07-23 Effective communication is a vital part of the social worker's job. This welcome new edition of a classic text provides students and practitioners with essential advice and guidance about communicating and interacting in a range of social work settings. Based on the author's extensive personal and teaching experience, the text offers a succinct introduction to a variety of communication techniques including symbolic non-verbal, verbal, written and electronic forms of communication. Importantly, it discusses the perspectives of service users and explores their experiences and interpretations of how a social worker looks, acts and speaks, thus giving a real insight into the implicit messages being conveyed. New to this edition are 'Putting it into Practice' activities and further reading suggestions designed to support learning and understanding and to enable readers to reflect critically for practice. Written in an appealing narrative style that cannot fail to draw the reader in, *Communication in Social Work* is an engaging and comprehensive book suitable both for social work and social care students and for newly qualified practitioners wanting to refresh their thinking and skills.

Social Capital and Information Technology Marleen Huysman, Volker Wulf, 2004 A multidisciplinary examination of the interplay between social capital (the value derived from social ties) and information technology. The concept of social capital or the value that can be derived from social ties created by goodwill, mutual support, shared language, common beliefs and a sense of mutual obligation has been applied to a number of fields from sociology to management. It is only lately, however, that researchers in information technology and knowledge management have begun to explore the idea of social capital in relation to their fields. This collection of thirteen essays by computer scientists, sociologists, communication specialists, economists and others presents a multidisciplinary look at this particular intersection of information technology and social science and the need to adopt a sociotechnical perspective. For the most part, the contributors take a positive view of the interplay of social capital, knowledge sharing and community building. Some essays look at specific instances including the on-line and face-to-face relationships of a community of athletes, the building of social capital among Iranian NGOs and the Internet-based communities created by the open source movement, while others discuss more general ideas of civic and personal communities. The last four essays examine computer applications that augment social capital, including topic and member-centered communications spaces such as the Expert Finder and the Loops system and virtual repositories of knowledge such as the Answer Garden and Pearls of Wisdom.

Social Experimentation and Public Policymaking David H. Greenberg, Donna Links, Marvin Mandell, 2003 Social experimentation randomly assigns individuals or groups to coverage by the policy of interest or a control group and then the groups are compared in terms of outcome. Greenberg, economics, U of Maryland; Links, mathematics/science and engineering, Community College of Baltimore County; and Mandell, policy sciences, U of Maryland, seek to assess whether the substantial investment in social experimentation in the United States has resulted in significant public policy changes. After explaining the general concepts behind social experimentation, they analyze five

case studies and determine that they are not of decisive importance in state policy making but they often serve useful purposes of policy formation Annotation c 2003 Book News Inc Portland OR booknews com Social Networking Communities and E-Dating Services: Concepts and Implications Romm Livermore, Celia,Setzekorn, Kristina,2008-08-31 This book provides an overview of the major questions that researchers and practitioners in this area are addressing at this time and by outlining the possible future directions for theory development and empirical research on social networking and eDating Provided by publisher **Social Work - Perceptions for a New Era** Helena Rocha,2024-12-04 Social Work Perceptions for a New Era focuses on resilience well being and justice in social work reflecting a diverse and innovative approach In an era marked by rapid technological advancements evolving societal norms and unprecedented global challenges the field of social work stands at a critical crossroads This book brings together diverse perspectives and approaches to address the multifaceted dimensions of social work in the contemporary world It illuminates the evolving view of social work highlighting its contribution to fostering resilience promoting wellbeing and advocating for justice **Social Media and Employment Law: An International Survey** Anders Etgen Reitz,Jan Rudolph,2015-09-23 In the last few years social media has become the primary way of communicating not only among friends and colleagues but also between employers and employees and between companies and consumers For employers the phenomenon offers great opportunities but also concomitant dangers due primarily to use of social media by employees and employees representatives Written in the context of employment laws as well as privacy laws this book surveys the state of the law in over thirty key jurisdictions including most of the developed countries of Europe Asia and North America and major developing countries worldwide The publication arose from a seminar prepared by the editors and others at which it was clearly identified that internationally operating employers need a comprehensive and user friendly multinational summary on employment and labour law questions arising in connection with the use of social media The book is divided into country chapters each written by a known local specialist In order to easily navigate through the issues for each country the chapters follow a uniform structure covering the applicable statutory regimes case law useful checklists and recommendations Among the issues and topics dealt with are the following employees entitlement to use social media at the workplace whether employers can require the use of social media by employees right of employers to monitor employees use of social media outside the workplace employers potential liability for employees misuse of social media right of employee representatives to use employers equipment for social media purposes employers remedies against misuse of social media by employees and employee representatives development and drafting of a social media policy and role of social media in employer employee disputes No other publication exists providing interested parties with a practical and strategic guide to legal issues affecting the use of social media in the workplace With its easy to use country by country format and its expert recommendations this unique resource will prove itself as an incomparable handbook for lawyers human resources professionals and in house counsel advising or

Journalism and Truth in an Age of Social Media James Everett Katz,Kate K. Mays,2019 Truth qualities of journalism are under intense scrutiny in today s world Journalistic scandals have eroded public confidence in mainstream media while

pioneering news media compete to satisfy the public's appetite for news. Still worse is the specter of fake news that looms over media and political systems that underpin everything from social stability to global governance. This volume aims to illuminate the contentious media landscape to help journalism students, scholars, and professionals understand contemporary conditions and arm them to deal with a spectrum of new developments ranging from technology and politics to best practices. Fake news is among the greatest of these concerns and can encompass everything from sarcastic or ironic humor to bot-generated made-up stories. It can also include the pernicious transmission of selected biased facts, the use of incomplete or misleadingly selective framing of stories and photographs that editorially convey certain characteristics. This edited volume contextualizes the current fake news problem. Yet it also offers a larger perspective on what seems to be uniquely modern, computer-driven problems. We must remember that we have lived with the problem of people having to identify, characterize, and communicate the truth about the world around them for millennia. Rather than identify a single culprit for disseminating misinformation, this volume examines how news is perceived and identified, how news is presented to the public, and how the public responds to news. It considers social media's effect on the craft of journalism as well as the growing role of algorithms, big data, and automatic content production regimes. As an edited collection, this volume gathers leading scholars in the fields of journalism and communication studies, philosophy, and the social sciences to address critical questions of how we should understand journalism's changing landscape as it relates to fundamental questions about the role of truth and information in society.
