Socialist City Spatial Structure And Urban Policy:

The Post-Socialist City Kiril Stanilov, 2007-08-13 In the large body of literature produced during the last fifteen years on the transformation of Eastern European societies after the fall of communism studies investigating changes in urban form and structure have been quite rare Yet a profound reorganization of the manner in which urban space is appropriated has taken place impacting the life of over 200 million urban residents in the region The patterns of spatial organization which have been established during this fairly limited but critical timeframe are likely to set the direction of future urban development in CEE cities for a long time This book focuses on the spatial transformations in the most dynamically evolving urban areas of post socialist Central and Eastern Europe linking the restructuring of the built environment with the underlying processes and forces of socio economic reforms We hope that the detailed accounts of the spatial transformations in a key moment of urban history in the region will enhance our understanding of the linkages between society and space adding to the knowledge that is needed for resolving the difficult challenges facing cities throughout the globe in the beginning of the twenty first century

The Vietnamese City in Transition Patrick Gubry, Frank Castiglioni, Jean-Michel Cusset, Nguyen Thi Thieng, Pham Thuy Huong, 2010 Since the Doi Moi policy of economic renovation was introduced in 1986 Vietnam has undergone deep transformations as a result of the transition to a socialist oriented market economy Social and urban transition has taken place in parallel as urban dynamics were spurred on by Vietnamese public and private stakeholders and by external agents such as international organizations and international solidarity organizations experts consultants and bilateral aid organizations Here are the results of research carried out by French Canadian and Vietnamese teams from the north and south of the country on the overarching theme of Vietnamese cities in transition Some of this research deals with urban dynamics some with the issues at stake within such dynamics or with the strategies of the most significant stakeholders in urban transition civil society donors within the framework of official aid for development consultants and international consultancy firms These projects were carried out between 2001 and 2004 as part of the Urban Research Programme for Development PRUD and mainly focus on Hanoi and Ho Chi Minh City or both in the case of comparative studies Is there such a thing as a Vietnamese model of an Asian city It seems that urban transition in Vietnam is not taking place in as radical and abrupt a manner as in China The country's capacity for absorbing external models the quest for a third way between state intervention and economic liberalism and the

fact that the country's architectural heritage is taken into account in urban planning are just some of the reasons for its particularity. The issues addressed in each chapter as well as the proposals for further research suggested by the contributors should act as a catalyst for urban research in Vietnam.

The Urban Mosaic of Post-Socialist Europe Sasha Tsenkova, Zorica Nedovic-Budic, 2006-12-02 The book explores urban dynamics in post socialist Europe 15 years after the fall of communism. The urban mosaic metaphor expresses the complexity, diversity and uniqueness of the processes and spatial outcomes in post socialist cities. The book examines the urban development and the policy and planning processes that have resulted from the socio economic, political and institutional transformations characterizing the move to markets and democracy. The emerging urban phenomena are illustrated with in depth case studies sensitive to historical themes, cultural issues and the socialist legacy. Cities featured in the book include Kazan, St Petersburg, Moscow, Warsaw, Prague, Komarno, Budapest, Belgrade, Bucharest, Sofia and Tirana. The edited volume is organized around the following four themes: the driving forces of post socialist change, urban processes and spatial change, housing and retail sector transformation and urban planning and policy responses.

Handbook of Urban Segregation Sako Musterd, 2020-03-28 The Handbook of Urban Segregation scrutinises key debates on spatial inequality in cities across the globe. It engages with multiple domains including residential places, public spaces and the field of education. In addition, it tackles crucial group dimensions across race, class and culture as well as age groups: the urban rich, middle class and gentrified households. This timely Handbook provides a key contribution to understanding what urban segregation is about, why it has developed, what its consequences are and how it is measured, conceptualised and framed.

Transformation of Cities in Central and Eastern Europe F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša Pichler-Milanović, 2005 Annotation This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the inter relationship between globalisation and urban transformation. It identifies and describes the inter and intra urban transformations of Central and Eastern European cities and considers their pre 1945 historic legacies, the socialist period and their contemporary transition towards market oriented and democratic systems. The dramatic changes since 1989, including the collapse of Communist ideology, the break up of the Soviet Union, Czechoslovakia and Yugoslavia, the end of the Cold War and the impact of globalisation and European integration have reconfigured this region and affected their re integration into European and global networks. This book first examines the similarities and differences between significant Central and Eastern European cities, comparing the differing patterns of historical context and socialist legacies before 1990 and the impacts of internal and external forces on re shaping these cities and their paths of transformation since 1990. It also examines the role of contemporary planning within the overall development of Central and Eastern European cities. The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re integration into global networks.
