Motta, A. Gunvald Nilsen, 2011-03-29 Popular struggles in the global south suggest the need for the development of new and politically enabling categories of analysis and new ways of understanding contemporary social movements This book shows how social movements in Africa South Asia Latin America and the Middle East politicize development in an age of neoliberal hegemony *The State, Class and Developmentalism in South Korea* Hae-Yung Song, 2019-10-16 This book problematises the statist underpinnings of the concept of the developmental state in terms of both state society and national global relations challenging the notion that the state is the agent of national development qua being autonomous from the domestic and global economies Presenting a thorough and comprehensive critical assessment of the extant approaches and theories of the Korean developmental state in particular this book demonstrates that the existing literature including Marxist critiques only inadequately and partially challenge statism It examines how statism reinforces and is reinforced by Third World Developmentalism the idea that development is in itself a positive goal and that a nationally autonomous mode of development should be promoted as a means of empowerment In opposition this book offers a critique of statism by constructing an alternative theoretical framework extending Marx's concept of commodity fetishism to state society and national global relations Drawing on a new theoretical framework and significant Korean literature *The State Class and Developmentalism in South Korea* offers a novel historical interpretation and critique of the developmental state in the Korean context As such it will be useful to students and scholars of Asian studies Development Studies and International Political Economy **New Left Review**, 2007 *English radicalism in the twentieth century* Richard Taylor, 2020-09-15 England has had a predominantly conservative political culture for some centuries Yet there is a persistent minority strand of radicalism that has challenged the practices beliefs and structures of power of the established order This book explores this radical tradition as articulated in the twentieth century The main currents of English radicalism range from liberal reformers

through socialist parliamentarians to social movement activists in the peace women's and labour movements. Despite their differing agendas, all have held their moral and political commitments to achieving a free, democratic, equal, and just society in common. Moreover, all have believed whatever their other differences in the importance of extra-parliamentary social movements. What is it that has constituted this radical tradition? Is it a coherent, distinctive, and important political force in the twentieth century? And how do these ideas and practices relate to radical politics in England in the early twenty-first century? This book offers an analysis of the historical and ideological development of English radicalism from the English Civil War onwards. Richard Taylor examines how the problems of achieving radical change in England in the twentieth century were approached by the ten key figures from a range of ideological positions within the tradition: Bertrand Russell, Sylvia Pankhurst, Ellen Wilkinson, George Orwell, E. P. Thompson, Michael Foot, Joan Maynard, Stuart Hall, Tony Benn, and Nicolas Walter.

The New Peasantries Jan Douwe van der Ploeg, 2012-05-23. This book explores the position, role, and significance of the peasantry in an era of globalization, particularly of the agrarian markets and food industries. It argues that the peasant condition is characterized by a struggle for autonomy that finds expression in the creation and development of a self-governed resource base and associated forms of sustainable development. In this respect, the peasant mode of farming fundamentally differs from entrepreneurial and corporate ways of farming. The author demonstrates that the peasantries are far from waning. Instead, both industrialized and developing countries are witnessing complex and richly chequered processes of re-peasantization, with peasants now numbering over a billion worldwide. The author's arguments are based on three longitudinal studies in Peru, Italy, and The Netherlands that span 30 years and provide original and thought-provoking insights into rural and agrarian development processes. The book combines and integrates different bodies of literature: the rich traditions of peasant studies, development sociology, rural sociology, neo-institutional economics, and the recently emerging debates on Empire.

Divided Province Greg Albo, Bryan M. Evans, 2019-02-28. No government jurisdiction in Canada has so radically transformed its public policies over the past decades as Ontario, and yet the province has also maintained a striking degree of political stability in its party system. Since the 1990s, neoliberalism has been the point of reference in constructing policy agendas for all of Ontario's political parties. It has guided the strategy for governance of the dominant Liberal Party since 2003, even as it divides the province between workers and employers, north and south, rural and urban, and racialized minorities and the majority population. With a focus on the governments of Mike Harris, Dalton McGuinty, and Kathleen Wynne, *Divided Province* brings together leading researchers to dissect the province's public policies since the 1990s. Presenting original state-of-the-art research, the book demonstrates that although the Conservative government of Mike Harris implemented the sharpest and most profound shift towards the establishment of a neoliberal regime in the province, the subsequent Liberal governments consolidated that neoliberal turn. The essays in this volume explore the consequences of this ideological turn across a spectrum of policies, including health, education, poverty, energy, employment,

manufacturing and how it has impacted workers women First Nations and other distinct communities The first book to offer a comprehensive critical account of neoliberalism in Ontario *Divided Province* overturns conventional readings of the province's politics and suggests that building a more democratic and egalitarian alternative to the current orthodoxy requires nothing less than a radical rupture from existing policies and political alliances Without such a decisive break political space may well open up again for the populist right **The Indian National Bibliography** B. Developmentalism to Neoliberalism Rahul A. Sirohi,2019-02-25 This book studies the experiences of Brazil and India the major economic powerhouses of the 21st century during the neoliberal era Both the nations have become important players in global markets and their economic performance has captured the attention of policymakers and academicians across the world The book explores the patterns of growth and the changing status of human development in the two regions since the 1980s In an attempt to better grasp the subtleties of their developmental experiences it also highlights the political and institutional dynamics that have undergirded the liberalization of the two countries **Black Collegiate Athletes and the**

Neoliberal State Albert Y. Bimper Jr.,2020-07-24 This study analyzes sociocultural productions of power knowledge identity and resistance through the lens of race in collegiate athletics Drawing on research at multiple institutions the author examines the lived experiences of current black student athletes pursuing their education and competing for elite NCAA Division 1 athletic departments The author situates the experiences of black athletes within the complexities of the American dream arguing that neoliberal beliefs and practices have perpetuated racial inequality through the system of collegiate sport

Indian National Bibliography B. S. Kesavan,2006 *Managing the Margins* Leah F. Vosko,2011-03-03 This book explores the precarious margins of contemporary labour markets Over the last few decades there has been much discussion of a shift from full time permanent jobs to higher levels of part time and temporary employment and self employment Despite such attention regulatory approaches have not adapted accordingly Instead in the absence of genuine alternatives old regulatory models are applied to new labour market realities leaving the most precarious forms of employment intact The book places this disjuncture in historical context and focuses on its implications for workers most likely to be at the margins particularly women and migrants using illustrations from Australia the United States and Canada as well as member states of the European Union *Managing the Margins* provides a rigorous analysis of national and international regulatory approaches drawing on original and extensive qualitative and quantitative material It innovates by analyzing the historical and contemporary interplay of employment norms gender relations and citizenship boundaries **The Spokesman** ,2005

Zaifer,2022-06-27 In Privatization in Turkey Power Bloc Capital Accumulation and State Ahmet Zaifer offers a rare look on privatization in Turkey that involves all three historical periods of Turkish privatization process 1980s and 1990s 2000s and 2010s and covers different forms of privatization from divestiture to public private partnership Benefiting from theoretically informed qualitative research spanning nearly a decade that has involved several interviews with key informant groups extensive review of newspaper articles and detailed analysis of annual reports of businesses Ahmet Zaifer convincingly proves that the acceleration of privatization in Turkey has not only provided advantages to so called favourable capital groups and the government elites but also consolidated the position of Capital in General at the expense of labouring popular classes and the natural environment of the entire country Climate, Capitalism and Communities Astrid B. Stensrud,Thomas Hylland Eriksen,2019-07-20 Until now the growing body of work on environmental anthropology has largely ignored the unavoidable impact of global capitalism on the environment and the extent to which capital itself is a key driver of climate change Climate Capitalism and Communities focuses explicitly on that nexus examining the injustices and inequalities as well as the activist responses that have arisen as a result and the contradictions between the imperatives of exponential economic growth and those of environmental sustainability and society as a whole Bringing an innovative ethnographic toolkit to bear on a crisis that is at once global and highly localised the authors shift attention away from the consequences of climate change to a focus on the social relations and power structures that continue to prevent effective action
