Valuing Nature Robert Fish, Holly McKelvey, 2021-11-16 When a group of liberal arts students embark on a university assignment about the natural environment no one could have quite prepared them for the bewildering array of questions and provocations to confront them in their task What starts out as an earnest attempt to understand nature in the modern world turns into a philosophical and practical tangle that only a good transdisciplinary education can provide Can anyone save the day and actually start to value nature And if they can't then what's stopping them The idea of valuing nature harmonises diverse areas of natural resource management and is an important dimension of scientific and practical work concerned with managing ecosystems and habitats for sustainability This graphic book takes the reader on an exploration of the issues that arise from this growing interest and concern in the valuation of nature Set around the premise of a motley group of undergraduates endeavouring to complete a university assignment on nature in the modern world the book explores the many and diverse meanings people assign to nature the different ways the relationship between people and nature might be characterised the many values systems people hold for the natural world the options and approaches society can deploy to manage it the extent to which we need entirely new economic systems to protect and sustain nature This highly interdisciplinary book invites consideration of a range of philosophical and applied debates and questions Written in an accessible style it is an ideal undergraduate text in the fields of ecology human and physical geography conservation science environment social science and spatial planning as well as a general primer for graduate natural and social scientists embarking on interdisciplinary research in the natural resource management arena

Creation and Hope Nicola Hoggard Creegan, Andrew Shepherd, 2018-04-25 We live in an ecological age Science in the last few hundred years has given us a picture of nature as blind to the future and mechanical in its workings even while ecology and physics have made us aware of our interconnectedness and dependency upon the web of life As we witness a possible sixth great mass extinction there is

increasing awareness too of the fragility of life on this planet In such a context what is the nature of Christian hope St Paul declares that all of creation will be set free from its bondage to decay and will obtain the freedom of the glory of the children of God How are we to imagine this freedom when death and decay are essential to biological life as we currently experience it and when the scientific predictions for life are bleak at best This book explores these questions reflecting on how our traditions shape our imagination of the future and considering how a theology of hope may sustain Christians engaged in conservation initiatives The essays in this volume are partly in dialogue with the ground breaking work of Celia Deane Drummond and are set in the context of global and local Aotearoa New Zealand ecological challenges

Technonatures Damian F. White, Chris Wilbert, 2010-04-05 Environmentalism and social sciences appear to be in a period of disorientation and perhaps transition In this innovative collection leading international thinkers explore the notion that one explanation for the current malaise of the politics of ecology is that we increasingly find ourselves negotiating technonatural space times International contributors map the political ecologies of our technonatural present and indicate possible paths for technonatural futures The term technonatures is in debt to a long line of environmental cultural theory from Raymond Williams onwards problematizing the idea that a politics of the environment can be usefully grounded in terms of the rhetoric of defending the pure the authentic or an idealized past solely in terms of the ecological or the natural In using the term technonatures as an organizing myth and metaphor for thinking about the politics of nature in contemporary times this collection seeks to explore

one increasingly pronounced dimension of the social natures discussion Technonatures highlights a growing range of voices considering the claim that we are not only inhabiting diverse social natures but that within such natures our knowledge of our worlds is ever more technologically mediated produced enacted and contested **Geodiversity** Murray

How to be a Green Liberal Simon A. Hailwood, 2014-12-18 It is often claimed by environmental philosophers and green political theorists that liberalism the dominant tradition of western political philosophy is too focused on the interests of human individuals to give due weight to the environment for its own sake In *How to be a Green Liberal* Simon Hailwood challenges this view and argues that liberalism can embrace a genuinely green non instrumental view of nature The book s central claim is that nature s otherness its being constituted of independent entities and processes that do not reflect our purposes is a basis for value and can be incorporated within liberal political philosophy as a fundamental commitment alongside human freedom and equality Hailwood argues that the conceptual resources already exist within mainstream liberalism for a thoroughly non instrumental perspective Adopting a rigorous philosophical approach Hailwood tackles a wide range of themes across environmental ethics including holistic theories deep ecology eco feminism and eco anarchism as well as issues in value theory and political philosophy more generally In making the case for liberalism s green credentials *How to be a Green Liberal* is a formidable challenge to recent green political theory and will be required reading not only for students of political philosophy but for all those interested in the natural world and man s relationship to it

Foucault and the History of Philosophical Transcendence Christopher Falzon, 2024-08-22 In an original approach to Foucault s philosophy Christopher Falzon argues for a reading of Foucault as a philosopher of finite transcendence and explores its implications for ethics In order to distinguish Foucault s position Falzon charts the historical trajectory of transcendence as a philosophical concept starting with the radical notion of transcendence that was introduced by Plato and which reappears in various forms in subsequent thinkers from the Stoics to Descartes and from Kant to Sartre He argues that Foucault s critique of the transcendent subject of humanism is a rejection not of transcendence per se but of radical transcendence in its distinctively modern form As such he shows how Foucault s conceptualisation of transcendence as finite enables a picture of the human being as neither fully determined nor a creature of infinite possibilities but as both subject and object affected by but also able to affect the world With the notion of finite transcendence Falzon captures the essence of Foucault s unique philosophy and provides a new insight into his contribution to ethics Demonstrating its contemporary relevance *Foucault and the History of Philosophical Transcendence* further explores the potential application of Foucault s approach to the current ecological crisis

Natural Resource Use and Global Change K. Bruckmeier, 2013-01-21 Building on recent developments in social ecology this book advances a new critical theory of society and nature exploring social metabolism and global resource flows in contemporary

society Barriers to global sustainability are identified and conditions for transforming industrial economies towards new sustainable resource use are described *Communication and the Evolution of Society* Jürgen Habermas, 2015-10-07 In this important volume Habermas outlines the views which form the basis of his critical theory of modern societies The volume comprises five interlocking essays which together define the contours of his theory of communication and of his substantive account of social change What is Universal Pragmatics is the best available statement of Habermas's programme for a theory of communication based on the analysis of speech acts In the following two essays Habermas draws on the work of Kohlberg and others to develop a distinctive account of moral consciousness and normative structures Toward a Reconstruction of historical Materialism takes these issues further offering a wide ranging reconstruction of Marx's historical materialism understood as a theory of social evolution The final essay focuses on the question of legitimacy and on the legitimization problems faced by modern states This book is essential reading for anyone concerned with the key questions of social and political theory today
