Society and Economy in Modern Britain 1700-1850 Richard Brown,2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history There is no doubt that change occurred but what was the nature of that change and how did it affect rural and urban society Beginning with an examination of the nature of history and Britain in 1700 this volume focuses on the economic and social aspects of the Industrial Revolution Unlike many previous textbooks on the same period it emphasizes British history and deals with developments in Wales Scotland and Ireland in their own right It is the emphasis on the diversity not the uniformity of experience on continuities as well as change in this crucial period of development which makes this volume distinctive In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain's political system and in its religious affiliations

The Royal Society and the Discovery of the Two Sicilies Manuela D'Amore,2017-08-09 This book illuminates a lesser known aspect of the British history of travel in the Enlightenment that of the Royal Society's special contribution to the discovery of

the south of Italy in the age of the Grand Tour By exploring primary source journal entries of philosophy and travel the book provides evidence of how the Society helped raise the Fellows curiosity about the Mediterranean and encouraged travel to the region by promoting cultural events there and establishing fruitful relations with major Italian academic institutions They were especially devoted to revealing the natural and artistic riches of the Bourbon Kingdom from 1738 to 1780 during which the Roman city of Herculaneum was discovered and Vesuvius and Etna were actively eruptive Through these examples the book draws attention to the role that the Royal Society played in establishing cultural networks in Italy and beyond Tracing a complex path starting in Restoration times this new insight into discourse on learned travel contributes to a more challenging vision of Anglo Italian relations in the Enlightenment *The Financing of John Wesley's Methodism C.1740-1800* Clive

Murray Norris,2017 It considers the Wesleyan brothers John 1703 1791 and Charles Wesley 1707 1788 Methodist movement The volume describes the struggle between what Methodists saw as the promptings of Holy Spirit and their daily confrontation with reality not least the financial constraints which they faced **On the Causes of Economic Growth**

Carlos Sabillon,2008 In a sweeping review of economic history the author presents the salient facts of booms and slowdowns in the major economies of the world in 50 year intervals and demonstrates the weakness of orthodox theories The only factor that consistently causes growth he shows is centralized support for manufacturing which spurs the creation of new technologies which lead to wealth creation Since the earliest of times human beings have endeavored to uncover the causes of prosperity Step by step Sabillon tests the principal theories on the causes of economic growth against the facts of history Here economic statistics of the world are presented in a rationalized format that allows for comparison across countries and through time with a challenge to those who study them to determine with an open mind what the statistics show and what are the trends beyond cherished theories that suit various political purposes Tested against the historical data textbook ideas and theories consistently come up short Such analyses are highly troubling because they reveal an absence of correlation between theory and reality The data statistics illustrating the development of the world economy during the last several centuries were extracted from economic history and economic history books from publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish Only decisive intervention in support of manufacturing and technological advancement can provide growth This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today s politically correct debates Agriculture, Economy and Society in Early Modern Scotland Robert Allan Houston,2024 Showcases the latest

research on Scotland s rural economy and society Early modern Scotland was predominantly rural Agriculture was the main

occupation of most people at the time so what happened in the countryside was crucial economically socially and culturally The essays collected here focus on the years between around 1500 and 1750 This period although before the main era of agricultural improvement in the late eighteenth and early nineteenth centuries was nevertheless far from static in terms of agrarian development Specific topics addressed include everyday farming practices investment landlords tenants and estate management and the cultural context within which agriculture was imagined The disastrous famine of 1622-23 is analysed in detail The volume is completed by a comprehensive survey of recent historiography setting agricultural history in its broader context

The Non-Representation of the Agricultural Labourers in 18th and 19th Century English Paintings

Penelope McElwee, 2016-02-08 The life of the poor rural worker appears to have been one of unmitigated toil within an unequal society a reality seldom endorsed in paintings of the eighteenth and early nineteenth centuries The contemporary viewer who constituted less than three per cent of the population wished to see visions of the idyllic golden landscapes of Merrie England peopled by happy contented workers or alternatively images of the Big House a feature and phenomenon now marching over the countryside fed by a new building frenzy This particular element would soon evolve into an all consuming preoccupation for the wealthy throughout the period Members of the upper echelons of society with their families all attired in fine silks and satins look out at their audience from ornately framed canvases as individuals Yet the rural poor the rabble at the gates the unseen workforce who toiled at the behest of the Master are virtually unknown They have left few records Enclosure came at a price The Poorhouse beckoned And still the agricultural labourer did virtually nothing for most of the eighteenth century to protest or rebel against the inequalities of his downtrodden existence Only the dreaded behemoth of the nineteenth century the threshing machine would stir him into action How would it end

Biography and Education Michael Erben, 2005-08-12 Over recent years, biographical studies have gained an increasingly important place in academic study. The two are inextricably linked. Education uses biography in teaching, and in biography, education features strongly as a formative stage in personal development. This book elaborates on the analytical work that has drawn attention to biography and education and seeks to expand the understanding of lives in educational contexts. Mainstream sociology has been quick to embrace this treatment of individuals as biographical appearances, but it is even more relevant in the field of education.
