Wear, Julie M. Aultman, 2006-08-18. In this collection of essays, the authors don't argue with those attributes deemed to be the essence of professionalism in medicine. Instead, they ask questions of the discourse from which they arise: how the specialized language of academic medicine disciplines has defined, organized, contained and made seemingly immutable a group of attitudes, values and behaviors subsumed under the label professional or professionalism. This collection aims to be a critical text, one that questions the profession's beliefs about the nature of its work and how such beliefs are enacted or not in medical education, particularly as they fuel the professionalism discourse. **The Ashgate Research Companion to Planning Theory** Patsy Healey, 2016-11-03.

At a time of potentially radical changes in the ways in which humans interact with their environments through financial, environmental and/or social crises, the rationale of spatial planning faces significant conceptual and empirical challenges. This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning. The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces. Through problematising planning itself, the values which underpin planning and theory/practice relations, contributions make visible the limits of established planning theories and illustrate how, by thinking about new issues or about issues in new ways, spatial planning might be advanced both theoretically and practically. There cannot be definitive answers to the conceptual challenges posed, but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future. A key question is not so much what planning theory is, but what might planning theory do in times of uncertainty and complexity. An underlying rationale is that planning theory and practice are intrinsically connected. The Companion is presented in three linked parts: issues which arise from an interactive understanding of the relations between planning ideas and the political/institutional contexts in which such ideas are put to work; key concepts in current theorising from mainly
