I. INTRODUCTION. In the last decade there has been a significant increase in sociolinguistic activity. There continues to exist a sort of academic cynicism about the field, but a significant number of relevant books have appeared (among others: Capell (1966), Ferguson & Gumperz (1960), Fishman (1968), Gumperz & Hymes (1964), Haugen (1966), Hertzler (1965), Hymes (1964), Lieberman (1967), and Ray (1963); a large number of symposia and conferences have been held; papers with a sociolinguistic bias are now presented with higher frequency in conventions, and in recent issues of journals one notices more papers related to sociolinguistic topics. In short, to use Haugen's words, sociolinguistics is '... gradually becoming respectable' (21).

All this activity is encouraging, but the birth pangs are not over. It is still true that (Kachru 1969):

In spite of the fast growing critical and descriptive studies in this area, two basic problems remain. First there is still no agreement on what is meant by sociolinguistics, or what should form the core of a course on sociolinguistics. Second, there is no suitable textbook which can be recommended to a class without much reservation (140).

The two books under review provide a framework in which progress in defining and consolidating the 'dimensions' of sociolinguistics may be reviewed.¹

2. THE FOCUS OF SOCIOLINGUISTICS. The papers in Bright's volume were presented at the Conference on Sociolinguistics (11-13 May, 1964) sponsored by the UCLA Center for Research in Languages and Linguistics. As the preface (7) says, this was perhaps the first conference focusing on the fast developing field of sociolinguistics, and each paper is followed by very stimulat-

[1] Fishman's book also appears as a part of Kurt Bach (ed.), *Social Psychology, An Introduction* (New York: John Wiley, 1971), and in Dutch-Flemish translation as *Taalsociologie*, translated by L. Pittery-van Son (steppe-Ninove; Labor-Brussel, 1970), as number 8 in the series *Talen en Cultuur*, ed. by Marcel de Greve and Van Passel, with a forward by A. Verdoodt. The Belgian book has useful indexes of subjects and persons, lacking in the American original. [D.H.]

provided a fertile space for non Eurocentric analysis for a number of reasons It has been embroiled in the long running
internal debate over the so called Nihonjinron revolving around the extent to which the effective interpretation of Japanese
society and culture requires non Western Japan specific emic concepts and theories This book takes this question further and
explores how we can understand Japanese society and culture by combining Euro American concepts and theories with those
that originate in Japan Because Japan is the only liberal democracy to have achieved a high level of capitalism outside the
Western cultural framework Japanese Studies has long provided a forum for deliberations about the extent to which the

Western conception of modernity is universally applicable Furthermore because of Japan s military economic and cultural dominance in Asia at different points in the last century Japanese Studies has had to deal with the issues of Japanocentrism as well as Eurocentrism a duality requiring complex and nuanced analysis This book identifies variations amongst Japanese Studies academic communities in the Asia Pacific and examines the extent to which relatively autonomous scholarship intellectual approach or theories exist in the region It also evaluates how studies on Japan in the region contribute to global Japanese Studies and explores their potential for formulating concrete strategies to unsettle Eurocentric dominance of the discipline
