Goodchild,Donald G. Janelle,2004-01-15 Spatial analysis assists theoretical understanding and empirical testing in the social sciences and rapidly expanding applications of geographic information technologies have advanced the spatial data gathering needed for spatial analysis and model making This much needed volume covers outstanding examples of spatial thinking in the social sciences with each chapter showing some aspect of how certain social processes can be understood by analyzing their spatial context The audience for this work is as trans disciplinary as its authorship because it contains approaches and methodologies useful to geography anthropology history political science economics criminology sociology and statistics **Harvey Sacks and Ethnomethodology** Graham Button,2025-10-09 Ethnomethodology and Conversation Analysis have made major inroads into the disciplines that make up the social sciences Although commonly run together under the title of EMCA what their relationship is to one another remains as elusive as the relationship between their respective founders Harold Garfinkel and Harvey Sacks This book clarifies the nature of these relationships demonstrating that Harvey Sacks studies of the sequential organisation of conversation are the cardinal example of what Garfinkel described as an ethnomethodological alternate to traditional social science However over the decades that have passed since Garfinkel developed ethnomethodology several confusions have arisen as to what he meant The author argues that these have resulted in a blunting of Garfinkel s original intentions which compromise the adequacy of ethnomethodological description In response this book shows how Sacks considerations of adequacy can ground ethnomethodology as a natural observational science that redirects it towards developing further coherent and precisely circumscribed bodies of work to those of Sacks own coherent and precisely circumscribed studies It will appeal to both new and existing scholars of ethnomethodology and conversation analysis as well as those with interests in social theory methodology and those who have taken up the relevance of conversation analysis for their research and are interested in the ethnomethodological heritage of conversation analysis *21st Century Sociology: A Reference Handbook* Clifton D.
