Allen, Thomas J., James M. Utterback, Marvin A. Sirbu, Nicholas A. Ashford, and J. Herbert Hollomon. "Government Influence on the Process of Innovation in Europe and Japan." 7 Research Policy 2 (April 1978): 124-149.

The authors outline the types of government policies that can seriously affect the process of innovation, either directly (as in policies aimed at stimulating innovation) or indirectly (as in the secondary effects of general fiscal or trade policies). The research project examined 164 projects in five major industries in Europe and Japan. They found government involvement, in general, to be high, but there were "striking" differences between countries in the methods employed by various governments, and, moreover, the study failed to detect "any effect, on project performance, of government attempts to stimulate innovation."

Focuses on four sources of major conflicts in the occupational health and safety issue: 1) differing self-interests of labor and management; 2) appropriate standards of proof of causality of occupational disease;
