Redeeming Thucydides' Book VIII Vasileios Liotsakis, 2017-06-12 Since antiquity Book 8 of Thucydides History has been considered an unpolished draft which lacks revision Even those who admit that the book has some elements of internal coherence believe that Thucydides if death had not prevented him would have improved many chapters or even the whole structure of the book Consequently while the first seven books of the History have been well examined through the last two centuries the narrative plan of Book 8 remains an obscure subject as we do not possess an extensive and detailed presentation of its whole narrative design Vasileios Liotsakis tries to satisfy this central desideratum of the Thucydidean scholarship by offering a thorough description of the compositional plan which in his opinion Thucydides put into effect in the last 109 chapters of his work His study elaborates on the structural parts of the book their details and the various techniques through which Thucydides composed his narration in order to reach the internal cohesion of these chapters as well as their close connection to the rest of the History Liotsakis offers us an original approach not only of Book 8 but also of the whole work since his observations reshape our overall view of the History **The Downside Review**, 1897 Language Change at the Syntax-Semantics Interface Chiara Gianollo, Agnes Jäger, Doris Penka, 2014-12-12 Bringing together diachronic research from a variety of perspectives notably typology formal syntax and semantics this volume focuses on the interplay of syntactic and semantic factors in language change an issue so far largely neglected both in mostly lexical historical semantics as well as historical syntax but recently brought into focus by grammaticalization theory as well as Minimalist diachronic syntax The contributions draw on data from numerous Indo European languages including Vedic Sanskrit Middle Indic Greek as well as English and German and discuss a range of phenomena such as change in negation markers indefinite articles quantifiers modal verbs argument structure among others The papers analyze diachronic evidence in the light of contemporary syntactic and semantic theory addressing the crucial question of how syntactic and semantic change are linked and whether both are governed by similar constraints principles and systematic mechanisms The volume will appeal to scholars in historical linguistics and formal theories of syntax and semantics **The Word Order of the Gospel of Luke** Ivan Shing Chung Kwong, 2005-12-09 This work studies the word order of the Gospel of Luke and some of its prominent messages with consideration of systemic functional linguistic theories The first part of the work focuses on the relative

positions of four constituents subject predicate complement and circumstantial adjunct of different types of Lukan clauses independent dependent infinitival participial and embedded clause The result gives some unmarked typical or common word order patterns and some marked word order patterns of all Lukan clauses The second part traces the foregrounded messages of the Gospel based on their related marked word order patterns incorporated with functional linguistic phenomena The result highlights the messages of Jesus disciples and his parents failure in understanding him Pilate s crime of handing over Jesus and Jesus predictions of his future sufferings and Peter s future failure JSNTS and Studies in New Testament Greek series **Euripides: 'Helen'** Euripides,William Allan,2008-02-21 Detailed commentary suitable for students on one of the most skilful and original Greek tragedies *Metrical Constraint and the Interpretation of Style in the Tragic Trimeter* Nicholas Baechle,2007-01-01 This study is an interpretation of the choices the tragedians made in regard to certain forms of standardized variations in word order and prosody Those choices were made in response to the competing demands of metrical constrain and the poets sense of what was stylistically appropriate for tragic trimeters [Aristotle's Metaphysics Beta](#) Michel Crubellier,André Laks,2009-05-21 Nine leading scholars of ancient philosophy from Europe the UK and North America offer a systematic study of Book Beta of Aristotle s Metaphysics The work takes the form of a series of aporiai or difficulties which Aristotle presents as necessary points of engagement for those who wish to attain wisdom The topics include causation substance constitution properties predicates and generally the ontology of both the perishable and the imperishable world Each contributor discusses one or two of these aporiai in sequence the result is a discursive commentary on this seminal text of Western philosophy
