Studies In Roman Property By The Cambridge University Research Seminar In Ancient History:

Studies in Roman Property Moses I. Finley, 1976-05-13 The actual practice of the Romans with regard to property and investment must be distinguished from the formal rules of the emperors and the moralistic generalizations of the ancient writers With this in mind the Cambridge Research Seminar in Ancient History spent two years examining various aspects of Roman property investigating individual topics in greater detail than has been attempted before The studies which make up this volume deal with Roman investment in property scale and concentration of holdings rural and urban property methods of exploitation and how this was organized and the extent of marginal lands The editor has formed the volume into a coherent unit by eliminating excessive duplication and overlapping between chapters The book is of particular value to specialists in ancient history economic and social history and in Roman law but also contains materials of interest to medieval and agrarian historians

Roman Law and Economics Giuseppe Dari-Mattiacci, Dennis P. Kehoe, 2020-05-26 Ancient Rome is the only society in the history of the western world whose legal profession evolved autonomously distinct and separate from institutions of political and religious power Roman legal thought has left behind an enduring legacy and exerted enormous influence on the shaping of modern legal frameworks and systems but its own genesis and context pose their own explanatory problems The economic analysis of Roman law has enormous untapped potential in this regard by exploring the intersecting perspectives of legal history economic history and the economic analysis of law the two volumes of Roman Law and Economics are able to offer a uniquely interdisciplinary examination of the origins of Roman legal institutions their functions and their evolution over a period of more than 1000 years in response to changes in the underlying economic activities that those institutions regulated Volume II covers the concepts of exchange ownership and disputes analysing the detailed workings of credit property and slavery among others while Volume I explores Roman legal institutions and organizations in detail from the constitution of the Republic to the management of business in the Empire Throughout each volume contributions from specialists in legal and economic history law and legal theory are underpinned by rigorous analysis drawing on modern empirical and theoretical techniques and methodologies borrowed from economics In demonstrating how these can be fruitfully applied to the study of ancient societies with due deference to the historical context Roman Law and Economics opens up a host of new avenues of research for scholars and students in each of these fields and in the social sciences more broadly offering new ways in which different modes of enquiry can connect with and inform each other

Capital, Investment, and Innovation in the Roman World Paul Erdkamp, Koenraad Verboven, Arjan Zuiderhoek, 2020-02-18 Investment in capital both physical and

financial and innovation in its uses are often considered the linchpin of modern economic growth while credit and credit markets now seem to determine the wealth as well as the fate of nations Yet was it always thus The Roman economy was large complex and sophisticated but in terms of its structural properties did it look anything like the economies we know and are familiar with today Through consideration of the allocation and uses of capital and credit and the role of innovation in the Roman world the individual essays comprising this volume go straight to the heart of the matter exploring such questions as how capital in its various forms was generated allocated and employed in the Roman economy whether the Romans had markets for capital goods and credit and whether investment in capital led to innovation and productivity growth Their authors consider multiple aspects of capital use in agriculture water management trade and urban production and of credit provision finance and human capital covering different periods of Roman history and ranging geographically across Italy and elsewhere in the Roman world Utilizing many different types of written and archaeological evidence and employing a range of modern theoretical perspectives and methodologies the contributors an expert international team of historians and archaeologists have produced the first book length contribution to focus exclusively on physical and financial capital in the Roman world a volume that is aimed not only at specialists in the field but also at economic historians and archaeologists specializing in other periods and places

The Sanctuary of Athena at Sounion Barbara A. Barletta, 2017-12-01 The Temple of Athena at Sounion has long been recognized as one of the most unusual buildings in the architectural history of Greece Its plan with columns uniquely on the front and only one side is unparalleled in the Greek world Excavations of the temple and other buildings there however were complicated by the fact that many architectural pieces from the site had been reused in a Roman temple in the Athenian Agora Here Barletta provides a fascinating examination of the early excavations at Sounion the debate over who was worshipped at the so called Small Temple within the sanctuary the varied architectural influences on the Temple of Athena and the later use of its architectural pieces in the Athenian Agora Building on unpublished work by William B Dinsmoor Jr and Homer A Thompson this study represents the first comprehensive view of the temple and its sanctuary
