Studies In The Acquisition Of Anaphora:

Studies in the Acquisition of Anaphora B. Lust, 2012-12-06 Today one fundamental set of issues confronts both the linguistic theory of Universal Grammar and the psychological study of human cognition. These issues concern the question of to what degree and how the human mind is programmed presumably biologically to acquire the complex knowledge of human language. As discussed in Volume I, anaphora has been critical to this study because while a critical property of language knowledge it is largely underdetermined by available evidence. While most previous research projects have generally addressed these issues through either linguistic analyses or psychological analyses of language data and have concerned themselves with either the role of innateness or the role of experience in language knowledge, this volume with its predecessor attempts to combine these approaches in fact to develop a research paradigm for their joint study. While Volume I emphasized study of the content and nature of the initial state, i.e. of the language faculty, this second volume emphasizes study of the way in which experience does or does not interact with this language faculty to determine language acquisition. We argue in the introduction that the issues addressed in Volume II are appreciable if not necessary complements to those addressed in Volume I. This is not only because a more comprehensive model of language acquisition requires so, but because a valid definition of the content of the initial state may require so.

Studies in the Acquisition of Anaphora B.

Lust, 2012-12-06 This book is addressed to a central area of current linguistics and psycholinguistics: anaphora. It is a collection of independent studies by individuals who are currently working on problems in this area. The book includes two independent volumes. The major focus of these volumes is a psycholinguistic problem: the first language acquisition of anaphora. The volumes are intended to provide a basic reference source for the study of this one central critical area of language competence. They combine results from the interdisciplinary study this area has attracted in recent years. Each of the studies collected here is intended to be readable independently of the others. Thus a theoretical linguist or psycholinguist may each use this book only in part. Two basic assumptions underlie this collection of studies. 1. Significant psycholinguistic study of the problem of first language acquisition requires a basis in linguistic theory. We look to linguistic theory for the formulation of testable hypotheses which are coherent with a general theoretical model of language competence and which by empirical confirmation or disconfirmation will have consequences which can be integrated in a general theory of language and of mind. This is because we pursue explanation of the problem of first language acquisition, not merely description. 2. We also look to linguistic theory for precision in the description of language stimuli and language behavior in empirical studies. This is in order to promote replicability and interpretability of empirical results.

Studies in the Acquisition of Anaphora Barbara C. Lust, 1986 **A Parameter-Setting Model of L2 Acquisition** S. Flynn, 2012-12-06 Recent developments in linguistic theory have led to an important reorientation of research in related fields of linguistic inquiry as well as in linguistics itself The developments I have in mind viewed from the point of view of government binding theory have to do with the characterization of Universal Grammar UG as a set of subtheories each with its set of central principles perhaps just one principle central to each subtheory and parameters perhaps just one for each principle according to which a principle can vary between an unmarked and a marked parametric value Chomsky 1985 1986 For example let us assume that there is an X bar theory in explanation of those features of phrase structure irreducible to other subtheories of UG Within X bar theory variation among languages is then allowed only with respect to the position the head of a phrase occupies in relation to its complements such that the phrases of a language will be either right or left headed Thus languages will vary between being right headed in this respect as in Japanese phrase structure and being left headed as in English phrase structure Everything else about the phrase structure of particular languages will be fixed within X bar theory itself or else it will fall out from other subtheories of UG Case theory θ theory etc Chomsky 1985 161-62 Chomsky 1986 2-4 and references cited there Hatters are the same in other modules of grammar

Processing and Producing Head-final Structures Hiroko Yamashita, Yuki Hirose, Jerome L. Packard, 2010-11-05 This book is the first collection of studies on an important yet under investigated linguistic phenomenon the processing and production of head final syntactic structures Until now the remarkable progress made in the field of human sentence processing had been achieved largely by investigating head initial languages such as English The goal of the present volume is to deepen our understanding by examining head final languages and offering a comparison of those results to findings from head initial languages This book brings together cross linguistic investigations of languages with prominent head final structures such as Basque Chinese German Japanese Korean and Hindi It will inform readers of linguistics with both theoretical and experimental backgrounds

as it provides accounts of previous studies offers experimentally based theoretical discussions and includes experimental stimuli in the original languages *Methods for Assessing Children's Syntax* Dana McDaniel, Cecile McKee, Helen Smith Cairns, 1996 Designed in part as a handbook to assist in the choice and use of methods for investigating children's grammar this volume presents a selection of methods and pointers for designing and conducting experimental studies and for evaluating research **Theoretical Syntax 1980–1990** Rosemarie Whitney Ostler, 1992-02-13 This volume is intended to be used by practicing scholars as well as students It represents all major and some of the minor trends that have evolved during the past decade Book titles from all available sources have been included as well as periodical articles from the major journals whenever there was evidence of a theoretical approach To ensure maximum accessibility of the entries listed books and articles in language other than English and unpublished dissertations and working papers have been excluded All entries are fully annotated and the volume is completed by indices of authors and subjects **Linguistics: The Cambridge Survey: Volume 2, Linguistic Theory: Extensions and Implications** Frederick J. Newmeyer, 1988-04-21 Linguistics The Cambridge Survey is a comprehensive introduction to prevalent research in all branches of the field of linguistics from syntactic theory to ethnography of speaking from signed language to the mental lexicon from language acquisition to discourse analysis Each chapter has been written by a specialist particularly distinguished in his or her field who has accepted the challenge of reviewing the current issues and future prospects in sufficient depth for the scholar and with sufficient clarity for the student Each volume can be read independently and has a particular focus Volume I covers the internal structure of the language faculty itself while Volume II considers the evidence for and the implications of a generativist approach to language Psycholinguistics and neurolinguistics are covered in Volume III and Volume IV concentrates on sociolinguistics and the allied fields of anthropological linguistics and discourse and conversation analysis Several of the chapters in the work concentrate on the interface between different aspects of linguistic theory or the boundaries between linguistic theory and other disciplines Thus in both its scope and in its approach the Survey is a unique and fundamental work of reference It undoubtedly fulfils the editor's principal aim of providing a wealth of information insight and ideas that will excite and challenge all readers with an interest in linguistics **Language in Development** Gita Martohardjono, Suzanne Flynn, 2021-08-17 Explorations of language development in different types of learner populations and across various languages This volume examines language development in different types of learner populations and across various languages The contributors analyze experimental studies of child and adult language acquisition heritage language development bilingualism and language disorders They consider theoretical and methodological issues language development in children discussing topics that range from gestures to errors in person and number agreement and development and attrition of morpho syntactic constructions in second language learners bilinguals and Alzheimer's patients The approach is crosslinguistic in three senses of the word the contributors offer analyses of

acquisition phenomena in different languages they consider crosslinguistic influence or the potential effects of multiple languages on one another in the mind of the same speaker and in a novel use of the term proposed by the editors the chapters bring together theoretical and methodological approaches pertinent to the linguistics of language development in children adults and heritage speakers
