Nicolas Edme Rétif de la Bretonne, 'Ingénue Saxancour' Mary S. Trouille, 2014-05-05 Set in Paris in the 1780s Rétif de la Bretonne's *Ingénue Saxancour* is a thinly veiled account of his daughter's disastrous marriage to an abusive husband. From the time of her marriage in January 1780 until she left her husband in July 1785, Agnès Rétif suffered continually from severe physical, sexual, and emotional abuse. Published in 1789, Rétif's novel scandalized the public with its graphic descriptions of his son-in-law's sexual perversity and brutal violence. Rétif's novel remains shocking more than two centuries later and continues to raise disturbing questions about power relations within abusive relationships. Perhaps most disturbing of all are the accusations leveled against Rétif himself concerning his motives for writing and publishing this account. Was he, as some charged, a shameless exhibitionist willing to reveal his family's darkest secrets merely to attract attention and broaden his readership? Was he an unscrupulous opportunist willing to capitalize on his daughter's misfortunes and risk her reputation simply to pay his debts? Or was he, as he himself claimed, trying to warn young women about the dangers of marrying men of dubious backgrounds against their parents' wishes? Rétif was all this and more: a reform-minded pioneer far in advance of his time with his graphic portrayal of spousal abuse, his call for greater public awareness of this perennial problem, and his crusade for liberal divorce laws that would allow women to escape from abusive relationships and to remarry. This, in fact, is what Agnès Rétif was able to do after passage of the divorce law passed by France's revolutionary government in 1792.

This is the first English translation of *Ingénue Saxancour* ever published and offers a wealth of background material on the novel and the real-life events that inspired it. French edition edited by Professor Trouille and published by the MHRA in 2014      **Scientific Institutions and Practice in France and Britain, c.1700-c.1870** Maurice Crosland,2023-05-31 This second collection of studies by Maurice Crosland has as a first theme the differences in the style and organisation of scientific activity in Britain and France in the 18th and early 19th centuries Science was more closely controlled in France notably by the Paris Academy of Sciences and the work of provincial amateurs much less prominent than in Britain The most dramatic change in any branch of science during this period was in chemistry largely through the work of Lavoisier and his colleagues the focus of several articles here and the dominance of this group caused considerable resentment outside France not least by Joseph Priestley The issue of authority in science emerges again within France under the rule of Napoleon in a study of the exceptional power exercised by the great mathematician Laplace both in theoretical science and in academic politics This exploration of organisation and power is complemented by a comparative study of the practice of early physics and chemistry and their different reliance on laboratories This raises the question of whether chemistry provided a model for later experimental work in other sciences both through the construction of pioneering laboratories and in establishing early schools of research      The Working-Class Intellectual in Eighteenth- and Nineteenth-Century Britain Aruna Krishnamurthy,2016-12-14 In Britain the period that stretches from the middle of the eighteenth century to the mid nineteenth century marks the emergence of the working classes alongside and in response to the development of the middle class public sphere This collection contributes to that scholarship by exploring the figure of the working class intellectual who both assimilates the anti authoritarian lexicon of the middle classes to create a new political and cultural identity and revolutionizes it with the subversive energy of class hostility Through considering a broad range of writings across key moments of working class self expression the essays reevaluate a host of familiar writers such as Robert Burns John Thelwall Charles Dickens Charles Kingsley Ann Yearsley and even Shakespeare in terms of their role within a working class constituency The collection also breaks fresh ground in eighteenth and nineteenth century scholarship by shedding light on a number of unfamiliar and underrepresented figures such as Alexander Somerville Michael Faraday and the singer Ned Corvan      William Robertson and the Expansion of Empire Stewart J. Brown,Stewart Jay Brown,2008-04-24 This is an exploration of William Robertson a leading figure in the eighteenth century Enlightenment      **Comparative Criticism: Volume 9, Cultural Perceptions and Literary Values** E. S. Shaffer,1987-10-29 The ninth volume of this annual journal continues the consideration of the relations of European with non European literatures begun in volume 8 It brings the series of special bibliographies on the history of comparative literary studies in the UK up to 1965 and contains the annual bibliography of comparative literature covering 1984      Montesquieu and Social Theory John Alan Baum,2013-10-02 Montesquieu and Social Theory details Montesquieu s contribution to sociology The title chronicles Montesquieu s work that led to establishing the fundamentals and principles of sociology The text first details Montesquieu s biographical account and then proceeds to discussing the Montesquieu s

motivation in his works The next chapters encompass Montesquieu s works which include Persian Letter Considerations on the Causes of the Greatness of the Romans and their Decline and On The Spirit of the Laws The last chapter details Montesquieu s influence in the late 18th and early 19th centuries The book will be of great interest to anyone who has a keen interest in the development of social science
