Studies In Ancient Greek Topography Part Viii:

Studies in Ancient Greek Topography W. Kendrick Pritchett, 2023-08-21 The thrust of the eighth volume of Professor Pritchett's topographical studies is on Demosthenes' Amphilochean campaign in 426 BC described in the closing chapters of Thucydides Book III with suggested identifications for the sites of the battles of Olpai and Idomenai Included is a commentary on the Thucydidean text dealing with such problems as Thucydidean seasons Demosthenes' generalship and the marching time of armies This study is followed by a survey of sites in northeastern Akarnania probably the best preserved walls of any province in Greece The author argues that these were not open cities in the late fifth and early fourth centuries offering comments on the use of siegecraft and scaling ladders in Greek warfare The position of gates in several enclosures prove that the road structure in the mountains of Akarnania was quite different from that of modern roads The volume concludes with a study of sites east of Thermopylai and in the Parnon range **Studies in Ancient Greek Topography, Part VIII.** William Kendrick Pritchett, 1993 **Studies in Ancient Greek Topography** W K Pritchett, 1991 This seventh volume of Prof Pritchett's studies correlating topography with ancient texts seeks to identify the sites and routes in Philip's campaign in northwest Greece in 219 B C Polybios his march on Thermon in 218 Polybios Demosthenes campaign in Aitolia in 426 Thucydides Agesilaos campaign in Akarnania in 389 Xenophon the march of the Romans over Mount Olympos in 169 Livy and Lykourgos raid on the Parnon littoral in 219 Polybios He also includes a unique collection of 175 photographs There follow four supplements in part inspired by the criticisms of other scholars on the topography of Thermopylai of Pausanias Argos Sparta road passing through the Battlefield of Champions and of the Messenian wars which includes a section on Homeric warfare **Topography and History of Ancient Epicnemidian Locris** José Pascual, Maria-Foteini Papakonstantinou, 2013-09-26 This book presents the results of a major project carried out by a team from the Universidad Autónoma de Madrid and the 14th Ephorate of Prehistoric and Classical Antiquities at Lamia The book gives a full picture of a extensive area of Greece known as Epicnemidian Locris on which very little has been studied and published in the past Its relevance in historical times was due to its natural environment and mainly on the pass at Thermopylae which marked the physical boundary between central northern Greece and the south being the scene of repeated conflicts The book offers a complete picture of what Epicnemidian Locris was like in the past its geography topography frontiers and the ancient settlements of the region **Polybius, Rome and the Hellenistic World** Frank W. Walbank, 2002-09-05 This volume contains nineteen of the more important of Frank Walbank's essays on Polybius and is prefaced by a critical discussion of the main aspects of work done on that author Several of these essays deal with specific historical problems for which Polybius is a major source Five deal with Polybius as an historian and three with his attitude towards Rome one of these raises the question of treason in relation to Polybius and Josephus Finally two papers discuss Polybius' later fortunes in England up to the time of John Dryden and in twentieth century Italy in the work of Gaetano de Sanctis Several of these essays originally
