Studies In Upplandic Runography:

Studies in Upplandic Runography Claiborne W. Thompson, 2014-11-06 *Studies in Upplandic Runography* is a detailed treatment of the runic inscriptions from the province of Uppland Sweden where runic art reached a high point in A D 1200 and where runic inscriptions are most numerous Most of the runic monuments discussed are from the eleventh century an important period when Sweden was making the transition from paganism to Christianity The names of nearly fifty rune carvers runographers professional and amateur are known However many of the inscriptions were left unsigned Claiborne Thompson examines the major problem of how an unsigned inscription is attributed to a known carver Since each carver had a distinctive style which must be delineated the book contains an exhaustive survey of the norms of Upplandic runography In order to match the inscriptions with their carvers Thompson analyzes the entire corpus of inscriptions from Uppland their formation the artistic designs they bear the shapes of the runes on them the orthography and language on them and the manner in which they were carved Thompson then establishes a set of criteria for determining the authorship of a runic monument stressing rune forms All of the criteria are used in an extensive discussion of the carvings of Asmund Karasun an interesting and influential carver from the first half of the eleventh century In addition Thompson s review of research describes scholarly interest in the problems of runography beginning in the early seventeenth century The book includes an introductory sketch of the cultural background of Uppland and relates the runic tradition to historical and cultural traditions in eleventh century Sweden

The History of the Reinforced Demonstrative in Nordic Eric T. Lander, 2020-10-26 The task of reconstructing the reinforced demonstrative paradigm for early Nordic has been called impossible by the eminent Einar Haugen In *The History of the Reinforced Demonstrative in Nordic* Eric T Lander aims to accomplish exactly this by way of an exhaustive study of the pronoun s attestations in the Viking Age runic inscriptions which are the earliest forms of this item to be recorded in Scandinavia The detailed picture of regional variation that emerges is then used to inform reconstructions of the paradigm from Proto Nordic to Common Nordic The book represents the first serious attempt in historical comparative linguistics to grapple with the morphological development of the North West Germanic reinforced demonstrative since the work of 19th century scholars like Sophus Bugge

The Unaccented Vowels of Proto-Norse Martin Syrett, 1994-01-01 The Unaccented Vowels of Proto-Norse attempts to analyse the unaccented vowel system attested in the proto-Norse period as partially attested in the older runic inscriptions in the elder futhark Each chapter in turn assesses the evidence for unaccented syllables of a particular category whether inflectional or derivational and decides whether any reliable conclusions can be drawn from it It is argued that too many widely accepted views are based on insufficient and poor methodology and that too little note has been taken of the fact that viable alternatives exist alongside most of our theories about proto-Norse In particular a new realisation that the inscriptions are written in a less than perfect orthographic system a notion that many scholars have often been unwilling to accept leads to some interesting new interpretations of the data
