Studies Voltaire 18th Century Volume 357:

British Art and the Seven Years' War Douglas Fordham, 2010-09-10 Between the Jacobite Rebellion of 1745 and the American Declaration of Independence London artists transformed themselves from loosely organized professionals into one of the most progressive schools of art in Europe In British Art and the Seven Years War Douglas Fordham argues that war and political dissent provided potent catalysts for the creation of a national school of art Over the course of three tumultuous decades marked by foreign wars and domestic political dissent metropolitan artists especially the founding members of the Royal Academy including Joshua Reynolds Paul Sandby Joseph Wilton Francis Hayman and Benjamin West creatively and assiduously placed fine art on a solid footing within an expansive British state London artists entered into a golden age of art as they established strategic alliances with the state even while insisting on the autonomy of fine art The active marginalization of William Hogarth's mercantile aesthetic reflects this sea change as a newer generation sought to represent the British state in a series of guises and genres including monumental sculpture history painting graphic satire and state portraiture In these allegories of state formation artists struggled to give form to shifting notions of national religious and political allegiance in the British Empire These allegiances found provocative expression in the contemporary history paintings of the American born artists Benjamin West and John Singleton Copley who managed to carve a patriotic niche out of the apolitical mandate of the Royal Academy of Arts

Sentimental Figures of Empire in Eighteenth-Century Britain and France Lynn Festa, 2006-10-15 In this ambitious and original study Lynn Festa examines how and why sentimental fiction became one of the primary ways of representing British and French relations with colonial populations in the eighteenth century Drawing from novels poetry travel narratives commerce manuals and philosophical writings Festa shows how sentimentality shaped communal and personal assertions of identity in an age of empire Read in isolation sentimental texts can be made to tell a simple story about the emergence of the modern psychological self Placed in conversation with empire however sentimentality invites both psychological and cultural readings of the encounter between self and other Sentimental texts Festa claims enabled readers to create powerful imagined relations to distant people Yet these emotional bonds simultaneously threatened the boundaries between self and other civilized and savage colonizer and colonized Festa argues that sentimental tropes and figures allowed readers to feel for others while maintaining the particularity of the individual self Sentimental identification thus operated as a form of differentiation as well as consolidation Festa contends that global reach increasingly outstripped imaginative grasp during this era Sentimentality became an important tool for writers on empire allowing conquest to be portrayed as commerce and scenes of violence and exploitation to be converted into displays of benevolence and pity Above all sentimental texts used emotion as an important form of social and cultural distinction as the attribution of sentience and feeling helped to define who would be recognized as human

The English Novel, 1700-1740 Robert Letellier, 2003-02-28 The English novel written between 1700 and 1740 remains a comparatively neglected area In

addition to Daniel Defoe whose Robinson Crusoe and Moll Flanders are landmarks in the history of English fiction many other authors were at work These included such women as Penelope Aubin Jane Barker Mary Davys and Eliza Haywood who made a considerable contribution to widening the range of emotional responses in fiction These authors and many others continued writing in the genres inherited from the previous century such as criminal biographies the Utopian novel the science fictional voyage and the epistolary novel This annotated bibliography includes entries for these works and for critical materials pertinent to them The volume first seeks to establish the existing studies of the era along with anthologies It then provides entries for a wide ranging selection of works which cover fictional theoretical historical political and cultural topics to provide a comprehensive background to the unfolding and understanding of prose fiction in the early 18th century This is followed by an alphabetical listing of novels their editions and any critical material available on each The next section provides a chronological record of significant and enduring works of fiction composed or translated in this period The volume concludes with extensive indexes

New Essays on the Political Thought of the Huguenots of the Refuge John Christian Laursen, 1995 After the Revocation of the Edict of Nantes in 1685 the Huguenot refugees who spread throughout Protestant Europe contributed greatly to the development of new political ideas and realities ranging from the theory and practice of freedom of the press through religious toleration and early modern economic discourse The essays in this volume throw new light on their work

A Natural History of Revolution Mary Ashburn Miller, 2011-08-15 How did the French Revolutionaries explain justify and understand the extraordinary violence of their revolution In debating this question historians have looked to a variety of eighteenth century sources from Rousseau s writings to Old Regime protest tactics A Natural History of Revolution suggests that it is perhaps on a different shelf of the Enlightenment library that we might find the best clues for understanding the French Revolution namely in studies of the natural world In their attempts to portray and explain the events of the Revolution political figures playwrights and journalists often turned to the book of nature phenomena such as hailstorms and thunderbolts found their way into festivals plays and political speeches as descriptors of revolutionary activity The particular way that revolutionaries deployed these metaphors drew on notions derived from the natural science of the day about regeneration purgation and balance In examining a series of tropes earthquakes lightning mountains swamps and volcanoes that played an important role in the public language of the Revolution A Natural History of

Revolution reveals that understanding the use of this natural imagery is fundamental to our understanding of the Terror
 Eighteenth century natural histories had demonstrated that in the natural world apparent disorder could lead to a restored
 equilibrium or even regeneration This logic drawn from the natural world offered the revolutionaries a crucial means of
 explaining and justifying revolutionary transformation If thunder could restore balance in the atmosphere and if volcanic
 eruptions could create more fertile soil then so too could episodes of violence and disruption in the political realm be
 portrayed as necessary for forging a new order in revolutionary France
