Studii Si Materiale De Istorie Medi Volume 6:

The Ottomans and Eastern Europe Michal Wasiucionek, 2019-06-27 In the seventeenth century previously peaceful relations between the Ottoman Empire and the Polish Lithuanian Commonwealth deteriorated into a series of military confrontations over the principalities of Moldavia and Wallachia Although scholars have generally interpreted this rivalry in terms of conflicting geopolitical interests this state centred approach ignores one of the most important developments of the period the devolution of power away from rulers and formal institutions towards political factions Drawing on Ottoman Polish and Romanian sources *The Ottomans and Eastern Europe* explores the complex interplay between regional politics and the rise of factionalism focusing on cross border patronage between Ottoman Polish Lithuanian and Moldavian elites By approaching the history of the region from a factional rather than state centred perspective this book investigates an alternative geography of power defined by personal interactions that straddled religious political and social boundaries between the elites Wasiucionek reveals the way in which these interactions not only shaped the Ottoman Polish rivalry over Moldavia but also influenced political culture throughout the region Published in Association with the British Institute at Ankara Sources of Serials ,1981 *The Impact of the European Reformation* Ole Peter Grell, 2017-05-15 Recent decades have witnessed the fragmentation of Reformation studies with high level research confined within specific geographical confessional or chronological boundaries By bringing together scholars working on a wide variety of topics this volume counteracts this centrifugal trend and provides a broad perspective on the impact of the European reformation The essays present new research from historians of politics of the church and of belief Their geographical scope ranges from Scotland and England via France and Germany to Transylvania and their chronological span from the 1520s to the 1690s Considering the impact of the Reformation on political culture and examining the relationship between rulers and ruled the book also examines the church and its personnel another sphere of life that was entirely transformed by the Reformation Important aspects of knowledge and belief are discussed in terms of scientific knowledge and technological progress juxtaposed with analyses of elite and popular belief which demonstrates the limitations of Weber's notion of the disenchantment of the world Together they indicate the diverse directions in which Reformation scholarship is now moving while reminding us of the need to understand particular developments within a broader European context demonstrating that movements for religious reform left no sphere of European life untouched **New Serial Titles** ,1974 A union list of serials commencing publication after Dec 31 1949 *East European Accessions Index* ,1958-04 **General Catalogue of Printed Books** British Museum.
