

Study Of Human Values

Dewitt H. Parker, De Witt Henry Parker

Study Of Human Values:

Human Values De Witt Henry Parker, 1931 The Study of Human Values Richard W. Kilby, 1993 This book grows out of a long felt need for a readable source that explores all aspects of people's values. Good information on the study of human values exists scattered about in various sources spanning disciplines and decades but it is not easily located nor readily assimilated and organized in mind. Richard W. Kilby attempts to remedy that situation. This book is a general comprehensive work on human values and is composed of chapters on types of values, their nature, their role in lives, their origins and methods of their study or assessment. It was written on the assumption that most of its readers would know little of the subject rather than be specialists but Kilby's main consideration was to include everything that was pertinent and to do full justice to each topic. One portion or another of *The Study of Human Values* should be useful to someone be it student, instructor, researcher or general reader. Human Values Dewitt H. Parker, De Witt Henry Parker, 1979-01-01

Understanding Human Values Milton Rokeach, 2008-06-30 This volume presents theoretical, methodological and empirical advances in understanding and also in the effects of understanding individual and societal values. *The Psychology of Human Values* Gregory R. Maio, 2016-10-19 This original and engaging book advocates an unabashedly empirical approach to understanding human values, abstract ideals that we consider important such as freedom, equality, achievement, helpfulness, security, tradition and peace. Our values are relevant to everything we do, helping us choose between careers, schools, romantic partners, places to live, things to buy, who to vote for and much more. There is enormous public interest in the psychology of values and a growing recognition of the need for a deeper understanding of the ways in which values are embedded in our attitudes and behavior. How do they affect our well-being, our relationships with other people, our prosperity and our environment? In his examination of these questions, Maio focuses on tests of theories about values through observations of what people actually think and do. In the past five decades, psychological research has learned a lot about values and this book describes what we have learned and why it is important. It provides the first overview of psychological research looking at how we mentally represent and use our values and constitutes important reading for psychology students at all levels as well as academics in psychology and related social and health sciences. **Modern Science and Human**

Values Everett W. Hall, 1959 **Modern Science and Human Values** William W. Lowrance, 1985 A thought provoking discussion of the various ways in which science, technology and medicine influence social philosophies and choices. Social attitudes, values and ethics are analysed for their roles in decision and policy making. Citing case studies, the continuing debate surrounding sociobiology, the role of peer review in formulating recombinant DNA research policy, societal guidance of medical experimentation and the application of risk assessment to nuclear reactor safety. Lowrance argues that society will be better served by a technical stewardship that extends beyond narrowly defined concepts of responsibility. This book will be of great interest to a wide range of medical researchers, scientists, ethicists and lay readers. **The Sociological Study of**

Human Values William R. Catton (Jr.),1952 *Modern Science and Human Values* Everett Wesley Hall,1956

Information and Human Values Kenneth Fleischmann,2022-06-01 This book seeks to advance our understanding of the relationship between information and human values by synthesizing the complementary but typically disconnected threads in the literature reflecting on my 15 years of research on the relationship between information and human values advancing our intellectual understanding of the key facets of this topic and encouraging further research to continue exploring this important and timely research topic The book begins with an explanation of what human values are and why they are important Next three distinct literatures on values information and technology are analyzed and synthesized including the social psychology literature on human values the information studies literature on the core values of librarianship and the human computer interaction literature on value sensitive design After that three detailed case studies are presented based on reflections on a wide range of research studies The first case study focuses on the role of human values in the design and use of educational simulations The second case study focuses on the role of human values in the design and use of computational models The final case study explores human values in communication via about or using information technology The book concludes by laying out a values and design cycle for studying values in information and presenting an agenda for further research
