## **Study Of Politics The Western Tradition:**

*The Study of Politics* Andrew Hacker, 1963      **John Selden and the Western Political Tradition** Ofir Haivry, 2017-06-29 This detailed analysis establishes John Selden as one of the most interesting and important early modern political theorists      Research Handbook on the History of Political Thought Cary J. Nederman, Guillaume Bogiaris, 2024-06-05 This insightful Handbook reviews the key frameworks guiding political scientists and historians of political thought Comprehensive in scope it covers historical methodology traditions epochs and classic authors and texts spanning from ancient Greece until the nineteenth century      *Political Theory* VD Mahajan, 2006 This is new edition contains a comprehensive study of the subject with the latest thinking by the political scientists of thw world today      *Confucius, Rawls, and the Sense of Justice* Erin Cline, 2013 This work examines the role of a sense of justice in the ethical and political thought of Confucius and John Rawls and argues that a comparative study can help us to better understand each of their views and apply their insights      **Religion and Violence in Western Traditions** André Gagné, Jennifer Guyver, Gerbern S. Oegema, 2021-09-16 This book examines the connection between religion and violence in the Western traditions of the three Abrahamic faiths from ancient to modern times It addresses a gap in the scholarly debate on the nature of religious violence by bringing scholars that specialize in pre modern religions and scriptural traditions into the same sphere of discussion as those specializing in contemporary manifestations of religious violence Moving beyond the question of the authenticity of religious violence this book brings together scholars from a variety of disciplines Contributors explore the central role that religious texts have played in encouraging as well as confronting violence The interdisciplinary conversation that takes place challenges assumptions that religious violence is a modern problem that can be fully understood without reference to religious scriptures beliefs or history Each chapter focuses its analysis on a particular case study from a distinct historical period Taken as a whole these chapters attest to the persistent relationship between religion and violence that links the ancient and contemporary worlds This is a dynamic collection of explorations into how religion and violence intersect As such it will be a key resource for any scholar of Religious Studies Theology and Religion and Violence as well as Christian Jewish and Islamic Studies      **Western Political Thought in Dialogue with Asia** Cary J. Nederman, Takashi Shogimen, 2008-12-16 Given the rise of globalization and coinciding increase in cultural clashes among diverse nations it has become eminently clear to scholars of political thought that there exists a critical gap in the knowledge of non Western philosophies and how Western thought has been influenced by them This gap has led to a severely diminished capacity of both state and nonstate actors to communicate effectively on a global scale The political theorists area scholars and intellectual historians gathered here by Takashi Shogimen and Cary J Nederman examine the exchange of political ideas between Europe and Asia from the Middle Ages to the early twentieth century They establish the need for comparative political thought showing that in order to fully grasp the origins and achievements of the West historians of political thought

must incorporate Asian political discourse and ideas into their understanding By engaging in comparative studies this volume proves the necessity of a cross disciplinary approach in guiding the study of the global history of political thought

Political Culture in Libya Amal S M Obeidi, Amal Obeidi, 2013-09-05 Few empirical studies of Arab countries have dealt with political culture and political socialisation or focused on people s beliefs values and attitudes towards the government or political leaders mainly because the regimes have been reluctant to allow opinion to be tested The significance of this book is that it assesses the influence of state ideology on the new generation of Libyans and examines their political culture *The Origins of the Western Legal Tradition* Ellen Goodman, 1995 Ellen Goodman uses extensive extracts from original writings to highlight the main themes of the Western legal tradition The strength of the book is its clear focus on the heart of the tradition constitutionalism representative institutions and rule by law Goodman links Christianity to its origins in Greek philosophy and Judaism She delves into the position of the Roman Church as the tenuous Dark Ages conduit Feudalism lives and dies and the common law and parliament emerge The author accurately and vividly charts the main currents avoiding both the shoals and the myriad tributaries and so enables readers to have a clearer and deeper understanding of our present legal system *Deconstructing Gender Stereotypes in Western Tradition* María Dolores García Ramos, María José Ramos Rovi, 2023-11-28 Traditional feminine description and roles within Western literary and artistic cultural artifacts have tended to portray women in very a specific way one which creates disseminates and consolidates the gender roles which became foundational to heteropatriarchy and sometimes male chauvinism As an example women in poetry are often portrayed as fragile sweet romanticized creatures who ignite masculine desire or bolster male artists creativity In this sense most Western lyrical traditions present women as either objects of desire or inspirational muses These secondary roles which transform women into subalterns can also be seen in other artistic manifestations such as painting and sculpture or more recently films TV fictions graphic novels and videogames This volume offers a multidisciplinary approach to the topic of feminine representation in literature and the arts presenting womanhood from new perspectives which highlight feminine characters who have traditionally been neglected misrepresented or reduced to marginal roles
