

Psychology study guide

- What is psychology? the scientific study of the human mind and its functions, especially those affecting behavior in a given context
- What is the mind? the element of a person that enables them to be aware of the world and their experiences, to think, and to feel; the faculty of consciousness and thought
- What is a gene? a unit of heredity which is transferred from a parent to offspring and is held to determine some characteristic of the offspring.
- What is a trait ? a distinguishing quality or characteristic, typically one belonging to a person.
- What is natural selection? the process by which heritable traits that make it more likely for an organism to survive and successfully reproduce become more common in a population over successive generations. It is a key mechanism of evolution.
- What is evolution? is the process whereby the frequencies of traits within populations of organisms can change over time. Its action over large stretches of time explains the origin of new species and ultimately the vast diversity of the biological world
- What is primary reality? the reality of our real world. In Primary reality, the experience evoking stimulation arrives at our sensory organs directly from objects from the real world.
- What is genetics? the scientific study of genes and heredity—of how certain qualities or traits are passed from parents to offspring as a result of changes in DNA sequence
- What is genomics? interdisciplinary field of biology focusing on the structure, function, evolution, mapping, and editing of genomes. A genome is an organism's complete set of DNA, including all of its genes as well as its hierarchical, three-dimensional structural configuration.
- What is heredity ? the passing on of physical or mental characteristics genetically from one generation to another.
- What is Psyche? the "life force" that gives living things their form, or soul as the form of the body.
