## **Studying Lives Through Time Personality And Development:**

**Studying Lives Through Time** David Charles Funder, American Psychological Association. Science Directorate, Jack Block, American Psychological Association, Radcliffe College. Henry A. Murray Research Center, University of California, Riverside. Center for Family Studies, University of California, Riverside. Department of Psychology, 1993 **Lives Through Time** J. Block, 2014-03-05 First published in 1983 The theme of this study is the importance of studying personality development and personality change in a differentiated way of identifying and understanding the alternative paths along which people evolve over time The time is adolescence with its implications for the life that is later led And the method is longitudinal an approach that can respond to questions regarding psychological development not otherwise scientifically accessible **The Psychoanalytic Study of Lives Over Time** Jonathan Cohen, Betram J. Cohler, 1999-09-02 The Psychoanalytic Study of Lives Over Time Clinical and Research Perspectives on Children Who Return to Treatment in Adulthood is a landmark volume that addresses an essential clinical question what is the nature of the process and outcome of clinical work with children An internationally renowned group of analytic clinicians and clinician researchers all comment on three fascinating child analytic situations where the patient returned to treatment in adulthood *Assessment of Biological Mechanisms Across the Life Span* Lisabeth F. DiLalla, Stephanie M. Clancy Dollinger, Stephanie MC Dollinger, 2013-06-17 Based on the First Biannual Lifespan Development Conference this volume offers a multidisciplinary and multidimensional approach to the study of lifespan development in the areas of neuropsychology cognition behavior genetics and perception The objective of the conference was to provide a lively forum for the discussion of issues related to lifespan development and to reflect on important topics challenging the field during the 1990s The chapters in this book motivated by the conference presentations cover the assessment and evaluation of developmental changes in visual perception the contribution of behavioral genetic factors to development the predictability of perinatal risk factors as they relate to cognitive and linguistic outcomes the neuropsychological changes during aging and innovative approaches to the study of cognitive development using neuropsychological testing methods **Handbook of Adult Development** Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from other researchers who have adopted more

mainstream approaches to adult development and aging. Regardless of the particular approach and or focus of the chapter, all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago. Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come.

*The Oxford Handbook of the Five Factor Model* Thomas A. Widiger, 2017-03-27. The Five Factor Model, which measures individual differences on extraversion, agreeableness, conscientiousness, emotional stability, and openness to experience, is arguably the most prominent dimensional model of general personality structure. In fact, there is now a considerable body of research supporting its construct validity and practical application in clinical health and organizational settings. Taking this research to the forefront, *The Oxford Handbook of the Five Factor Model* showcases the work of expert researchers in the field as they each offer important insight and perspective on all that is known about the Five Factor Model to date. By establishing the origins, foundation, and predominance of the Five Factor Model, this Handbook will focus on such areas as construct validity, diagnosis, and assessment, personality neuroscience, and how the Five Factor Model operates in business and industry, animal personality, childhood temperament, and clinical utility.

*Promoting Positive Parenting* Femmie Juffer, Marian J. Bakermans-Kranenburg, Marinus H. Van IJzendoorn, 2023-06-22. The Classic Edition of *Promoting Positive Parenting* illuminates the widespread success of the Video Feedback Intervention to promote Positive Parenting and Sensitive Discipline (VIPP-SD), now used in many countries, offering thousands of families the support they need to thrive. A new preface from the authors reflects on the original research and development of the program, considers its effectiveness, and outlines future aims to broaden implementation and test new modalities. The original volume offers a new generation of students and professionals an introduction to the brief and focused parenting intervention program that has been successful in a variety of clinical and nonclinical groups and cultures. It offers detailed descriptions and case reports of studies with the program, describes the implementation and testing of VIPP-based interventions in a variety of family and childcare settings, and in various countries including the Netherlands, Italy, the United Kingdom, and the United States. It details the successful implementation of the program in samples of insecure mothers, mothers with eating disorders, preterm infants, adopted children, children suffering from dermatitis, and children with early externalizing behavior problems. The Classic Edition of *Promoting Positive Parenting* is for all those concerned with family support and parenting interventions in the fields of developmental and clinical psychology, human development, and family studies, psychiatry, social work, public health, and nursing, and early childhood education.
