Taking Shelter from the Storm ,2006 **Taking Shelter from the Storm** ,1999 Risk Management Series: Safe Rooms and Shelters - Protecting People Against Terrorist Attacks Federal Emergency Agency,U. S. Department Security,2013-01-26 This manual is intended to provide guidance for engineers architects building officials and property owners to design shelters and safe rooms in buildings It presents information about the design and construction of shelters in the work place home or community building that will provide protection in response to manmade hazards The information contained herein will assist in the planning and design of shelters that may be constructed outside or within dwellings or public buildings These safe rooms will protect occupants from a variety of hazards including debris impact accidental or intentional explosive detonation and the accidental or intentional release of a toxic substance into the air Safe rooms may also be designed to protect individuals from assaults and attempted kidnapping which requires design features to resist forced entry and ballistic impact This covers a range of protective options from low cost expedient protection what is commonly referred to as sheltering in place to safe rooms ventilated and pressurized with air purified by ultra high efficiency filters These safe rooms protect against toxic gases vapors and aerosols The contents of this manual supplement the information provided in FEMA 361 Design and Construction Guidance for Community Shelters and FEMA 320 Taking Shelter From the Storm Building a Safe Room Inside Your House In conjunction with FEMA 361 and FEMA 320 this publication can be used for the protection of shelters against natural disasters This guidance focuses on safe rooms as standby systems ones that do not provide protection on a continuous basis To employ a standby system requires warning based on knowledge that a hazardous condition exists or is imminent Protection is initiated as a result of warnings from civil authorities about a release of hazardous materials visible or audible indications of a release e g explosion or fire the odor of a chemical agent or observed symptoms of exposure in people Although there are automatic detectors for chemical agents such detectors are expensive and limited in the number of agents that can be reliably detected Furthermore at this point in time these detectors take too long to identify the agent to be useful in making decisions in response to an attack Similarly an explosive vehicle or suicide bomber attack rarely provides advance warning therefore the shelter is most likely to be used after the fact to protect occupants until it is safe to evacuate the building Two different types of shelters may be considered for emergency use standalone shelters and internal shelters A standalone shelter is a separate building i e not within or attached to any other building that is designed and constructed to withstand the range of natural and manmade hazards An internal shelter is a specially designed and constructed room or area within or attached to a larger building that is structurally independent of the larger building and is able to withstand the range of natural and manmade hazards Both standalone and internal shelters are intended to provide emergency refuge for occupants of commercial office buildings school buildings hospitals apartment buildings and private homes from the hazards resulting from a wide variety of extreme events The shelters may be used

during natural disasters following the warning that an explosive device may be activated the discovery of an explosive device or until safe evacuation is established following the detonation of an explosive device or the release of a toxic substance via an intentional aerosol attack or an industrial accident Standalone community shelters may be constructed in neighborhoods where existing homes lack shelters Community shelters may be intended for use by the occupants of buildings they are constructed within or near or they may be intended for use by the residents of surrounding or nearby neighborhoods or designated areas *Safe Rooms and Shelters* ,2006 [Safe rooms and shelters: Protecting People Against Terrorist Attacks](#) , NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price while supplies last This manual is intended to provide guidance for engineers architects building officials building and home inspectors and property owners to design shelters and safe rooms n buildings It presents informaton about the design and construction of shelters in the work place home or community building that will provide protection in response to manmade hazards Included is information to assist in planning and design of shelters that may be constructed outside or within dwellings or public buildings designed to protect individuals from assaults and attempted kidnapping which requires design featur to resist forced entry and ballistic impact Protective options from low cost expedient protection such as sheltering in place to safe rooms ventilated and pressurized with purified air by ultra high efficiency filters and more Related products Taking Shelter From the Storm Building a Safe Room for Your Home or Small Business Includes Construction Plans CD can be found here <https://bookstore.gpo.gov/products/sku/064-000-00069-1> ctid 138 A Study of Active Shooter Incidents in the United States Between 2000 and 2013 can be found here <https://bookstore.gpo.gov/products/sku/027-001-00101-3> Incremental Protection for Existing Commercial Buildings From Terrorist Attack Providing Protection to People and Buildings can be found here <https://bookstore.gpo.gov/products/sku/064-000-00043-8> Reference Manual to Mitigate Potential Terrorist Attacks Against Buildings Providing Protection to People and Buildings is available here <https://bookstore.gpo.gov/products/sku/064-000-00038-1> World Trade Center Building Performance Study Data Collection Preliminary Observations and Recommendations is available here <https://bookstore.gpo.gov/products/sku/064-000-00029-2> Other products produced by U S Federal Emergency Management Agency FEMA can be found here <https://bookstore.gpo.gov/agency/528> *Taking Shelter from the Storm* ,2006 **Taking Shelter from the Storm** United States.
