Taking Stands Gender And The Sustainability Of Rural Communities:

Taking Stands Maureen Gail Reed, 2003 Environmental activism in rural places frequently pits residents whose livelihood depends on resource extraction against those who seek to protect natural spaces and species. While many studies have focused on women who seek to protect the natural environment, few have explored the perspectives of women who seek to maintain resource use. This book goes beyond the dichotomies of pro and anti environmentalism to tell the stories of these women. Maureen Reed uses participatory action research to explain the experiences of women who seek to protect forestry as an industry, a livelihood, a community, and a culture. She links their experiences to policy making by considering the effects of environmental policy changes on the social dynamics of workplaces, households, and communities in forestry towns of British Columbia's temperate rainforest. The result is a critical commentary about the social dimensions of sustainability in rural communities. A powerful and challenging book, *Taking Stands* provides a crucial understanding of community change in resource dependent regions and helps us to better tackle the complexities of gender and activism as they relate to rural sustainability. Social and environmental geographers, feminist scholars, and those engaged in rural studies, environmental sustainability, and community planning will find it invaluable.

This Elusive Land Melody Hessing, Rebecca Raglan, Catriona Sandilands, 2005 *This Elusive Land* provides an introduction to the literature about women and the environment in Canada. It looks at the ways in which women integrate the social and biophysical settings of their lives and features a range of contexts in which gender mediates, inspires, and informs a sense of belonging to, and in this land. Drawing from geographical, historical, and cultural perspectives, the volume reveals the significance of women's experiences in various landscapes. Jacket

Reshaping Gender and Class in Rural Spaces Belinda Leach, 2016-04-08 Leach and Pini bring together empirical and theoretical studies that consider the intersections of class, gender, and rurality. Each chapter engages with current debates on these concepts to explore them in the context of contemporary social and economic transformations in which global processes that reconstitute gender and class interconnect with and take shape in a particular form of locality, the rural. The book is innovative in that it responds to calls for more critical work on the rural, other than contributes to scholarship on gender and rurality, but does so through the lens of class. This book places the question of gender, rurality, and difference at its centre through its focus on class, addresses the urban bias of much class scholarship, as well as the lack of gender analysis in much rural and class academic work. It focuses on the ways that class mediates the construction and practices of rural men, masculinities, and rural women, femininities, challenges prevalent and divergent assumptions, with chapters utilising contemporary theorisations of class. With the empirical strongly grounded in theory, this book will appeal to scholars working in the fields of gender, rurality, identity, and class studies.

Rural Analysis and Management Francisco J.

Tapiador, 2007-09-28 This handbook possesses two virtues that are becoming increasingly difficult to find together. The first one is providing a novel and original scheme to analyze the rural areas of the planet in the context of Earth sciences. The handbook

is so original in its plan that it actually defines what modern rural science is. The scheme followed, albeit new, is rooted in a venerable geographical tradition and presents a sensible balance between the academic and the applied viewpoints. This novel way of studying rural areas represents by itself a valuable contribution to this complex field. The second virtue of the book is the ability of synthesizing the most important aspects of the issues tackled, and there are many issues this book tackles, from physical to human geography and from deontology to matrix algebra. When writing a handbook in such a vast field as rural science, it is indeed tempting to accumulate meaningless information assisted by the wealth of available online information. On the other side, the danger of forgetting essential aspects is always present. None of these problems seems to have affected the making of this book. The pictures and tables always have a place; the text never loses its coherence, and no comment seems superfluous. Also, the ambitious scope of the book is seemingly effortlessly solved by a rational, clear, and logical scheme that dissects all the relevant issues up to the required point.

Climate Change and Gender in Rich Countries Marjorie Griffin Cohen, 2017-06-26. *Climate Change, Gender and Work in Rich Countries* is unique in that it covers a wide range of issues dealing with work and climate change in wealthy industrialized countries. It shows how the gendered distinctions in both experiences of climate change and the ways that public policy deals with issues has been absent in policy discussions and why their inclusion matters.

Routledge Handbook of Gender and Environment Sherilyn MacGregor, 2017-07-14. The *Routledge Handbook of Gender and Environment* gathers together state-of-the-art theoretical reflections and empirical research from leading researchers and practitioners working in this transdisciplinary and transnational academic field. Over the course of the book, these contributors provide critical analyses of the gender dimensions of a wide range of timely and challenging topics, from sustainable development and climate change politics to queer ecology and interspecies ethics in the so-called Anthropocene. Presenting a comprehensive overview of the development of the field from early political critiques of the male domination of women and nature in the 1980s to the sophisticated intersectional and inclusive analyses of the present, the volume is divided into four parts: Part I Foundations, Part II Approaches, Part III Politics, policy and practice, Part IV Futures. Comprising chapters written by forty contributors with different perspectives and working in a wide range of research contexts around the world, this Handbook will serve as a vital resource for scholars, students, and practitioners in environmental studies, gender studies, human geography, and the environmental humanities and social sciences more broadly.

Social Transformation in Rural Canada John R. Parkins, Maureen G. Reed, 2012-12-06. The rapidly changing nature of life in Canadian rural communities is more than a simple response to economic conditions. People living in rural places are part of a new social agenda characterized by transformation of livelihoods, landscapes, and social relations; these profound changes invite us to reconsider the meanings of community, culture, and citizenship. *Social Transformation in Rural Canada* presents the work of researchers from a variety of fields who explore the dynamics of social transformation in rural settlements across several regions and sectors of the Canadian landscape. This volume provides a nuanced portrait of how

local forms of action adaptation identity and imagination are reshaping aboriginal and non aboriginal communities in rural Canada Unlike many previous studies this work looks at rural communities not simply as places affected by external forces but as incubators of change and social units with agency and purpose many of which provide exemplary models for other communities facing challenges of transition

The Americas and Oceania: Assessing Sustainability Ray C.

Anderson, Sara G. Beavis, Michael L. Dougherty, Tirso Gonzales, Ricardo Braun, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01 The Americas and Oceania Assessing Sustainability provides extensive coverage of sustainability practices in two regions linked culturally and historically by their relative isolation before the Columbian exchange by their colonization after it and by the challenges of pollution resource overuse and environmental degradation Regional experts and international scholars focus on environmental history in areas such as the South Pacific islands now particularly threatened by rising ocean levels due to climate change and on countries whose governments and corporations can play a major role in promoting or discouraging sustainable choices Brazil an emergent power on the world stage the United States the world's third most populous nation and New Zealand seemingly on its way to becoming an enviable model of sustainable development

Towards a Political Economy of Resource-dependent Regions Greg Halseth, Laura Ryser, 2017-08-18 This book advances our understanding of resource dependent regions in developed economies in the 21st Century It explores how rural and small town places are working to find success in a new economy marked by demographic economic social cultural political and environmental change How are we to understand the changes and transformations working through communities and economies Where are the trajectories of change leading these resource dependent places and regions Drawing upon examples from Canada USA UK Australia New Zealand and the Nordic countries these and other questions are explored and addressed by constructing a critical political economy framework of resource hinterland transition *Towards a Political Economy of Resource Dependent Regions* is a key resource for students and researchers in geography rural and industrial sociology economics environmental studies political science regional studies and planning as well as policy makers those in industry and the private sector and local and regional development practitioners

Masculinities and Management in Agricultural Organizations Worldwide Barbara Pini, 2017-11-30 Using contemporary gender theory to examine gender and rurality beyond that of simply women femininities this illuminating book accurately locates the subject of masculinities within the rural agricultural context While there has been a wealth of literature on men and masculinities published in recent years the climate of ideas has been typically experienced through an urban lens This book therefore investigates new conceptual territory Embedded in the literature on gender and rurality as well as the scholarship on gender and organizations management the book draws on an in depth ethnographic study of gender relations in Australian agricultural politics It will speak to academic audiences in rural social sciences gender studies and management organization studies
