A Transatlantic History of the Social Sciences Christian Fleck, 2011-03-04 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com From the beginning of

the twentieth century scientific and social scientific research has been characterised by intellectual exchange between Europe and the US The establishment of the Third Reich ensured that from the German speaking world at least this became a one way traffic In this book Christian Fleck explores the invention of empirical social research which by 1950 had become the binding norm of international scholarship and he analyses the contribution of German refugee social scientists to its establishment The major names are here from Adorno and Horkheimer to Hirshman and Lazarsfeld but at the heart of the book is a unique collective biography based on original data from more than 800 German speaking social scientists Published in German in 2008 to great acclaim Fleck s important study of the transatlantic enrichment of the social sciences is now available in a revised English language edition *A Genealogy of Method* Sondra L. Hausner,2024-07-16 What does it mean to study culture and what does culture finally mean Whether we compare cultures or delve deeply into the dynamics of a single social order anthropology s task is to confront the interplay of the human condition and the cultural form Tracing the genealogy of our touchstone method ethnography and investigating its relation to alternative disciplines that try to get at the heart of the human experience philology history and social relations this volume considers whether contemporary anthropology might at last be able to define culture after more than a century of investigation **Deconstructing Human Development** Juan Telleria,2020-12-09 This book provides a critical deconstruction of the human development framework promoted by the United Nations Development Programme UNDP since 1990 Taking the Human Development Reports of the UNDP as its starting point for reflection this book investigates the construction of this framework as well as its political function since the end of the Cold War The book argues that the UNDP s discourse on development relies on essentialist philosophical cultural and political assumptions dating back to the 19th century and concludes that these assumptions also present in the MDGs and SDGs impede a full grasp of the complex and multi layered global problems of the current world Whilst development critiques traditionally relied on liberal Marxist or Foucauldian theoretical frameworks and focused on epistemological or political economy issues this book draws on the post foundational and post structuralist work of Ernesto Laclau and Jacques Derrida and proposes an ontological and relational reading of development discourses that both complements and further develops the insights of previous critiques This book is key reading for advanced students and researchers of Critical Development Studies Political Science the UN and Sustainable Development **Sociology Confronts the Holocaust** Judith M. Gerson,Diane L. Wolf,2007-07-11 There is an enormous amount of scholarship on the Holocaust and there is a large body of English language sociological research Oddly there is not much overlap between the two fields This text covers both fields **The Synchronization of National Policies** Pertti Alasuutari,2015-09-25 The Synchronization of National Policies shows how it is possible that there is remarkable uniformity in the policies that the nation states adopt although there is no world government Mainstream research attributes such global governance to the influence of leading countries to functional requirements created by capitalism and technological development or to

international organizations This book argues that to understand how national policies are synchronized we need to realize that the global population forms a single global tribe of moderns divided into some 200 clans called nations While previous research on the world culture of moderns has focused on the diffusion of ideas this book concentrates on the active role of local actors who introduce global models and domesticate them to nation states In national policymaking actors justify new policies by international comparisons by the successes and failures of models adopted in other countries and by building and appealing to the authority of international organizations Consequently national policies are synchronized with each other Yet because of the way such domestication of global trends takes place citizens retain and reproduce the understanding that they follow a sovereign national trajectory This book will be of interest to students and scholars of sociology world culture theory globalization international relations and political science
