Latimer, 2011-12-23 In recent years the library community has seen a renewed interest in library architecture and design. This is due to the change of focus from content and collection development to how libraries engage with their users in a digital age. This means that librarians, architects, politicians, and patrons must develop new visions, concepts, and ideas for the design and building of libraries. This book brings together a number of articles based on presentations from the IFLA World Congress 2009: historical view of the development of children's libraries over the last century; a look at how children use new media libraries of the future; innovative design projects for children's libraries from around the world; current theme; historical view and new projects **Distributed Computing and Artificial Intelligence, 11th International**
