Prehistoric Humans in Film and Television Michael Klossner, 2015-01-09 From the early days of the movies cavemen have been a popular subject for filmmakers not surprisingly since the birth of cinema occurred only a few decades after the earliest scientific studies of prehistoric man Filmmakers however were not constrained by the emerging science instead they most often took a comedic look at prehistory a trend that continued throughout the 20th century Prehistoric humans also populated adventure fantasy films with the original One Million B C 1940 leading the charge Documentaries were also made but it was not until the 1970s that accurate film accounts of prehistoric humans finally emerged This exhaustive work provides detailed accounts of 581 film and television productions that feature depictions of human prehistory Included are dramas and comedies set in human prehistory documentaries and films and television shows in which prehistoric people somehow exist in historical periods from the advent of civilization up to the present or in extraterrestrial settings Each entry includes full filmographic data including year of release running time production personnel cast information and format A description of each film provides background on the prehistoric elements Contemporary critical commentary is included for many of the works *Understanding Climate's Influence on Human Evolution* National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on the Earth System Context for Hominin Evolution, 2010-04-17 The hominin fossil record documents a history of critical evolutionary events that have ultimately shaped and defined what it means to be human including the origins of bipedalism the emergence of our genus Homo the first use of stone tools increases in brain size and the emergence of Homo sapiens tools and culture The Earth's geological record suggests that some evolutionary events were coincident with substantial changes in African and Eurasian climate raising the possibility that critical junctures in human evolution and behavioral development may have been affected by the environmental characteristics of the areas where hominins evolved *Understanding Climate's Change on Human Evolution* explores the opportunities of using scientific research to improve our understanding of how climate may have helped shape our species Improved climate records for specific regions will be required before it is possible to evaluate how critical resources for hominins especially water and vegetation would have been distributed on the landscape during key intervals of hominin history Existing records contain substantial temporal gaps The book's initiatives are presented in two major research themes first determining the impacts of climate change and climate variability on human evolution and dispersal and second integrating climate modeling environmental records and biotic responses *Understanding Climate's Change on Human Evolution* suggests a new scientific program for international climate and human evolution studies that involve an exploration initiative to locate new fossil sites and to broaden the geographic and temporal sampling of the fossil and archeological record a comprehensive and integrative scientific drilling program in lakes lake bed outcrops and ocean basins surrounding the regions where hominins evolved and a major investment in climate modeling experiments for key time

The Feminist Architecture of Postmodern Anti-Tales Kendra Reynolds,2019-10-23 This monograph aims to counter the assumption that the anti tale is a subversive twin or dark side of the fairy tale coin instead it argues that the anti tale is a genre rich in complexity and radical potential that fundamentally challenges the damaging ideologies and socializing influence of fairy tales The Feminist Architecture of Postmodern Anti Tales Space Time and Bodies highlights how anti tales take up timely debates about revising old structures opening our minds up to a broader spectrum of experience or ways of viewing the world and its inhabitants They show us alternative architectures for the future by deconstructing established spatio temporal laws and structures as well as limited ideas surrounding the body and ultimately liberate us from the shackles of a single minded and simplistic masculine reality currently upheld by dominant social forces and patriarchal fairy tales themselves It is only when these masculine fairy tales and social architectures are deconstructed that new more inclusive feminine realities and futures can be brought into being
